STUDY ON THE EMPLOYABILITY SKILLS OF M.B.A. STUDENTS IN ENGINEERING COLLEGES

ABSTRACT

The present study is aimed to investigate the students’ of M.B.A.’s perception on the Employability Skills. The study also considered the students’ personal variables related to the factors of Employability Skills. Samples of 500-students, who are studying in the final year of M.B.A., were randomly selected from five colleges in and around Chennai. The samples of students were administered 50-items of Employability Skills Questionnaire, which measured six independent factors namely: Stress Coping, Communication Skills, Leadership Skills, Teamwork and Problem Solving, Time Management and Self-Efficacy.

The collected data were statistically analysed using the ‘t’-test, one way ANOVA, MANOVA, Regression Analysis, Stepwise Multiple Regression, etc. The results indicate that the emerged six factors were statistically significant. Significant mean differences were noticed among the personal variables of students on the factors of Employability Skills.
