List of Tables

Table 3.1  Population status and distribution of barasingha in Dudhwa Kishanpur Conservation Units 24
Table 3.2  Encounter rate of barasingha in different sites and season in Dudhwa National Park 24
Table 3.3  Population of barasingha in Dudhwa National Park as reported by Holloway (1972), Schaaf & Singh (1977), V P Singh (1984), Sankaran (1988 89), Ahmed & Khiri (2005) and this study 2006 24
Table 3.4  Mean group size of barasingha across different sites of Dudhwa-Kishanpur Conservation units 25
Table 3.5  Comparative data on herd size 1988 & 2006 25
Table 3.6  Monthly group size of barasingha group types in Dudhwa-Kishanpur Conservation Units 26
Table 3.7  Proportion of different age and sex categories in five different sites of Dudhwa-Kishanpur Conservation Units 29
Table 3.8  Number of Adult Males (AM) and Fawn (FN) per 100 females in five different sites of Dudhwa-Kishanpur Conservation Units 29
Table 4.1  Overall mean Pellet group density (pellet group/ha) of species found in five different transects in Dudhwa National Park 47
Table 4.2  Mean pellet group density (pellet group/ha) of species found in summer in five different transects in Dudhwa National Park 47
Table 4.3  Mean density (individuals/km2) of different deer species in Dudhwa National Park 47
Table 4.4  Correlation between pellet group density of three major ungulates species with habitat variables in Dudhwa National Park 48
Table 4.5  Principal Component Analyses of animal and random plots of barasingha in Dudhwa in 2006 49
Table 4.6  Principal Component Analyses of presence and absence plots of chital in Dudhwa in 2006 51
Table 4.7  Principal Component Analyses of animal and random plots of hog deer in Dudhwa in 2006 53
Table 4.8  Grasses or grass like plant species consumed by barasingha in Dudhwa National Park 55
Table 4.9  Composition of different prey species in Tiger scats (n=69) during winter 2005-2006 in Dudhwa National Park 92
Table 4.10 Composition of different prey species in Tiger scats (n=31) during summer 2006 in Dudhwa National Park 92
Table 4.11 Composition of different prey species in Tiger scats (n=16) during monsoon 2006 in Dudhwa National Park 93
Table 4.12 Prey represented in 116 scats of tiger in Dudhwa National Park Uttar Pradesh, India from 2005 – 2006, together with estimated biomass and numbers of prey consumed 96
Table 6.5  Prey represented in 69 scats of leopard in Dudhwa National Park Uttar Pradesh, India from 2005 – 2006, together with estimated biomass and numbers of prey consumed
