ACKNOWLEDGEMENT

It is indeed true that accomplishment of any goal calls for hard work, sincerity and dedication, but such an accomplishment of goal becomes achievable and falls within one’s reach if one proceeds with proper method and right direction. This becomes accessible through proper guidance and supervision. Again, while accomplishing a difficult task is wide-ranging and sometimes unanticipated difficulties may arise which might make one to lose one’s courage and slacken one’s dedication. Under such a kind of circumstances a person not only giving guidance but also giving encouragement and moral support is required to be at hand. During the period of my work, I was in the midst of unexpected obscurity. Though, I never slacken my dedication and lose my courage when such a situation meets. It is only because of my guide, who has extended me moral support at that hour of need.

At the very outset, I would like to express my feeling of indebtedness to my guide Dr. D. P. Bharambe, who not only guided me and supervised my work but also gave such a kind of requisite never-failing encouragement and moral support as well. He has guided throughout the entire work from initial stage to completion. It is his guidance and encouragement, which made possible for me to acknowledge the generosity for the kind venture he had extended during my research work. I would like to mention here the supreme courtesy and sympathy that I always received from him. Moreover, his dynamic personality and unrivalled store of knowledge have been of great beneficial in my studies.

My sincere thanks to Dean, Faculty of Technology and Engineering, The M. S. University of Baroda, Prof. C. N. Murthy (former Head, Applied Chemistry Department) and Prof. P. T. Deota (Head, Applied Chemistry Department) for their timely administrative and academic help since my Ph. D. registration under the department.
Acknowledgement

I would also like to thank the faculty members of Applied Chemistry Department, especially Prof. Uma Chudasam, Prof. Jayrang Dave, Dr. Ashish Prajapati, Dr. Sandhya Dixit, Dr. Avni Umaat, Dr. Anvita Dandale, Dr. Ranbahadur Yadav, Dr. Rakesh Sharma, Dr. Shailesh Shah and Dr. Babita Sehgal for their constant support and valuable suggestions with enthusiastic environment during research work.

I express my sincere gratitude to Dr. Dhanesh Patel, Professor, Applied Mathematics Department, Faculty of Technology and Engineering, The M. S. University of Baroda, Vadodara, for the valuable help, moral support and encouragement rendered to me.

I am deeply indebted to Mr. Sushil Chaudhari, who was with me with true moral support at difficult times and making me pass through difficult situations with great ease during many stages of my research work. Also he is responsible for creating me the optimism and carry out this work with great ease and precision with technical advices.

I convey special acknowledgement to Dr. R. D. Tiwari (Chief Chemist) and Mr. Pradeep Rai (Technical Asst.), ONGC, Ankleshwar Asset and Dr. Krishnamurthy and Mr. Nayanbhai, ONGC, Mehsana Asset for their valuable help by providing the virgin crude oils for measurement of rheological and pour point studies.

support, companionship, entertainment, care and encouragement they provided during my research work.

It is not a usual case that a student feels highly attached to a non-teaching staff of the Applied Chemistry Department. I am thankful to Mrs. Hemlata Pandya, Mr. Parag Vaishnav, Mrs. Kamini Patel, Mrs. Bhavna Desai non-teaching staff for their standing help and guidance in all the official matters.

The enthusiastic assistance and help of my colleagues and many friends in the hostel- Dr. V. S. Hall, The M. S University of Baroda, which I received during my endeavour of this work is in a very real sense of co-operation and harmony. I have had occasion to become acquainted with them with many criticisms and comments while discussing the relevant information. Not only for educational purpose but also they pull out intimate camaraderie which makes more meaningful my social life at Baroda. To them I owe a debt of obligation and enormous gratitude for the various ways in which they rendered me help during my association with them. During the course of this work, I have no short of assistance from my friends. Special thanks, however be made of S. V. Rajesh (Anna), Sunil Shah, Niken Desai, Harish Talele, Hemant Mande, Prashant Naik, God Free Fernandes, Dinakaran, Koiramba Singh, Bhavesh Patel, Mahesh Patel, Keyur Patel, Jaymin Rai, Gopal Bhatt, Sachin Joshi, Iqbal Vohra, Vishalbhai, Harnish Soni and Narayan Balappagol.

I would be ungrateful on my part if I do not extend my esteem gratitude to Mr. Chotubhai H Patel (mama) for his warm encouragement, support and security they have provided throughout the course of my studies since inception. I am further indebted to Mrs. Rekhaben C Patel (mami), who always provided me emotional support at the time when I needed it most. I wish to express my deepest thanks to Mr. Deepak M Patel (masaji), Mr. Suman P Patel (fuvaji), Mr. Pravin K Patel (fuvaji), Mr. Rajesh H Patel (mama), and Mr. Rakesh P Patel (cousin brother)
for supported me a lot in the initial phase of this research and encouragement during research work.

And it is my family, especially my parents, who I have to thank for encouraging me to pursue my dreams, whatever and however strange they may have been. Ultimately, it has been their love, support and dedication which have made this work possible. I know that my mother specially, has endured long restless nights, worrying and caring about me. I can never repay her love but hope to make a little contribution through the completion of this thesis. My gratitude goes to my father for giving me the freedom to pursue my lengthy academic work. It was his, sometimes silent and sometimes vociferous, support that sees me today at a place where he was always wanted to see me. My deepest heartfelt gratitude and indebtedness belong to my both beloved sisters (Apeksha and Trupti) and brother-in-laws (Mitesh and Pradip) for their emotional support, love and encouragement which made me strong enough to complete this work.

Without the full support of my extensive social network, I do not believe I would have finished this journey as sanely or with the degree of confidence I currently feel. Thanks to my friends, family and colleagues, thank you for understanding why writing this thesis has been such a priority for the last six months and for not forgetting me as I spent long nights and weekends staring at my computer screen.

Finally, I memorize the company and helping hand of all my friends and well wishers during the course.

If I have left anyone out, I sincerely apologize, but know that my thanks goes out to you as well. Any mistakes within text are unintentional and purely the fault of the author.

Mayur Ramanlal Patel
