ACKNOWLEDGEMENT

I owe a deep sense of gratitude to my Guide, Professor B.K. Chakraborty, Head, Department of Foods and Nutrition, Faculty of Home Science, M.S. University of Baroda, for his valuable guidance, constructive criticisms and without whose generous help, this work would not have taken shape. His powerful insight has helped a great deal to hammer out the details that have gone into the thesis.

I wish to extend my special thanks to the Panel of Judges selected amongst the staff and student members of Home Science faculty for their immense cooperation and critical evaluation of the product which gave meaningful results for this study. I also wish to thank the Director - IDRC project Prof. Tara Gopaldas, for giving me some financial assistance for the purchase of raw materials and other laboratory facilities.

My sincere thanks are due to Dr. M.R. Patel for using their microwave oven for the study, to Shri M Katwala and Shri Arun Amin for providing me the packaging material for storage studies and to Mr Omprakash Jhadhav for the art work.

Equally significant are my sincere thanks to Kapiar Komputers and especially to Mrs. Gopi Shah - a Statistician cum Computer programmer, who so willingly and patiently helped me to analyse the data, make figures and type out the thesis.
A bit closer to home, I would like to add my heartfelt appreciation to my husband Kiran Sheth and my son Shashin for their infinite support, patience and cooperation.

I appreciate the moral support extended to me by my brother Dr. Vikas Dosi and friends including Vandana, Vanisha Rama, Sunita, Syed, Farhat, Kavita, Vandana Rai, Elizabeth, Noopur, Anbrasi, Preeti, Neha, Anima and many others.

Mini Sheth
