LIST OF FIGURES

4.1 : Experimental plan of the study
4.2 : Localities selected for handwa survey
4.3 (1-II) : Set-up of a traditional handwa oven and sandbath
4.4 (a-b) : Placement of thermometers in handwa oven and sandbath during baking
4.5 : Freshly prepared handwa indicating the porous crumb texture and golden brown crust
5.1.1 (a-d) : Handwa preparation and consumption practices of Gujarati families.
5.1.2 (a-b) : Pattern of purchasing/making handwa mixes and its composition.
5.1.3 (a-c) : Fermentation practices used by Gujarati families.
5.1.4 (a-c) : Addition of oil, sugar and vegetable to the batter.
5.1.5 (a-b) : Amount and type of vegetable added to the batter.
5.1.6 (a-b) : Baking practices of Gujarati families.
5.1.7 (a-c) : Storage & shelf-life of left-over handwas
5.1.8 (a-c) : Attributes of good handwa, preferred flavours and desire to purchase from food establishments.
5.2 1 : Time-temperature profile of handwa being baked in handwa oven.
5.2 2 : Time-temperature profile of handwa being baked in sandbath.
5.2.3 (a-f) : Effect of mix mesh size on handwa quality.
5.2 4 (a-h) : Effect of batter moisture level on handwa quality.
5.2.5 : Effect of amount and type of culture on TA and pH of fermented batters.
5.2.6 (a-d) : Effect of duration of fermentation on TA, pH and sensory qualities of handwas prepared from it.
5.2.7 (a-g) : Effect of refrigerated storage on handwa quality.
5.2.8 (a-g) : Effect of room temperature storage on handwa quality.
5.3.1 (a-h) : Effect of substitution of rice with wheat, jowar, maize and bajra on handwa quality.
5.3.2 (a-h) : Effect of substitution of red gram dal and bengal gram dal (1:1) with green gram dal, black gram dal, moth beans, peas, lentil and val on handwa quality.
5.3.3 : Preparation schedule for R-B handwa mix
5.3.4 (I-III): Effect of storage of ready-to-bake mixes packed in Aluminium and Polyethylene pouches on moisture, FFA and peroxide value.
5.3.5 (I-III): Effect of storage of ready-to-bake mixes packed in Aluminium and Polyethylene pouches on overall acceptability, flavour and specific volumes of handwas prepared from them.
5.4.1 (a-i) : Effect of blending the standard mix formulations with balanced formulations on handwa quality.
5.4.2 (a-e) : Percent excess / deficit of RDA for various nutrients in popular, balanced and blends of handwa mix for school goers, adolescent boys and adult man.
