# Contents

Chapter 1  
Introduction  
1.1 Introduction  
1.2 Scope of the study  
1.3 Review of literature  
1.4 Selected models of work stress  
1.4.1 Person - environment fit model  
1.4.2 Stress cycle model  
1.4.3 Transactional model  
1.4.4 Integrative - transactional process model  
1.4.5 Role - episode model  
1.5 Selected models of coping  
1.5.1 Kahn et al.’s Model  
1.5.2 Mc Grath’s model  
1.5.3 French et al.’s model  
1.5.4 Newmann and Beehr’s model  
1.5.5 Shuler’s model  
1.5.6 Pareek’s model  
1.5.7 Moos and Billing’s model  
1.5.8 Moos and Sinha’s model  
1.6 Objectives of the study  
1.7 Gender methodology  
1.7.1 Agenda  
1.7.2 Epistemology
Chapter 2

Stress of Women Entrepreneurs

2.1 Introduction
2.2 Roles
2.3 Why work?
2.4 Socialization
2.5 Family related stress
2.6 The contextual system
2.7 Empowerment of women
Chapter 3
Gender Ideology and Counselling

3.1 Introduction
3.2 Roles of education, religion, and culture in sustaining gender ideology
3.3 Social theory on gender construction through culture mediums.
3.4 A Case study on gender ideology
3.5 Deconstructing the constructs and transformation
   3.5.1 Attitude to sex roles – an illustration
   3.5.2 Training needs of women entrepreneurs
3.6 Stress and emotion: clinical illustrations
3.7 Marital relationship
3.8 Counselling system
   3.8.1 Mechanism of counselling
   3.8.2 Crisis stress intervention
   3.8.3 “Do”s in counselling
   3.8.4 “Don’t”s in counselling
Chapter 4
Analyses of the Data

4.1 Introduction
4.2 Factors of significantly different stress variables
4.3 Factors of not significantly different stress variables
  4.3.1 Role conflict
4.4 Coping with stress
4.5 Discriminant function analysis of stress
4.6 Model of stress
  4.6.1 Model of work related stressors
  4.6.2 Model of general orientation
  4.6.3 Model of attitude to sex roles
  4.6.4 Model of coping orientation
4.7 Validation of the models
4.8 Conclusion

Chapter 5
Summary of Major Findings and Conclusion

5.1 Introduction
5.2 Summary of findings
  5.2.1 Findings from the analyses of significantly different stress variables
  5.2.2 Findings from the analyses of not significantly different stress variables
5.3 Coping with stress
  5.3.1 Findings from the analyses of General orientation
  5.3.2 Findings from the analyses of Attitude to sex roles
  5.3.3 Findings from the analyses of Coping orientation
5.4 Suggestions 197
5.5 Conclusion 197
5.6 Contribution of the researcher 200
5.7 Scope for further research 200
5.8 Concluding remarks 201

Bibliography 211
Appendix I Questionnaire on Stress and Coping 230
Appendix II Discriminant Function Analyses 240
Appendix III Discriminant function analysis of work stressors 259
Appendix IV Discriminant function analysis in general orientation 265
Appendix V Discriminant function analysis of attitude to sex roles 270
Appendix VI Discriminant function analysis of coping orientation 274
Appendix VII Validation tests of discriminant function analysis of work related stressors 279
Appendix VIII Validation tests of discriminant function analysis of general orientation 285
Appendix IX Validation tests of discriminant function analysis of coping orientation 289
Appendix X Schedule on Stress and Coping - I 294
Appendix XI Schedule on Stress and Coping - II 298
