SECTION II

PART 1
Chapter 1
Determination of Polarity Parameters of Chemically Modified Banana Fibres by Means of the Solvatochromic Technique
Chapter 2
Influence of Chemical Treatments on the Electro-kinetic Properties, IR Spectra and Morphology of Cellulose Fibres

PART 2
Chapter 1
Mechanical and Dynamic Mechanical Analysis of Short Banana Fibre Reinforced Polyester Composites
Chapter 2
Effect of Fibre Surface Treatments on the Mechanical Properties of Short Banana Fibre Reinforced Polyester Composites
Chapter 3
Dynamic Mechanical Analysis of Chemically Modified Short Banana Fibre Reinforced Polyester Composites
Chapter 4
Effect of Chemical Modification on the Water Absorption Behaviour of Banana Fibre Reinforced Polyester Composites
Chapter 5
Stress Relaxation Behaviour of Short Banana Fibre Reinforced Polyester Composites

PART 3
Chapter 1
Hybrid Composites of Short Banana Fibre and Glass Fibre: Mechanical Properties, Stress Relaxation and Water Absorption Behaviour
Chapter 2
Dynamic Mechanical Analysis of Banana/Glass Hybrid Fibre Reinforced Polyester Composites

PART 4
Chapter 1
Static and Dynamic Mechanical Properties of Banana/Glass Woven Textile Composites
