## CONTENTS

**PREFACE**

1-iii

**LIST OF TABLES**  
vii-ix

**Chapter One : INTRODUCTION**

1. Introduction  
2. Saving and Economic Growth  
3. Inflation and Growth  
4. Inflation and Saving  
5. Objective and Scope of the Study  
6. Methodology  
7. Plan of the Study  

**Chapter Two : METHODOLOGY AND SOURCE OF DATA**

1. Introduction  
2. Survey of Work on Portfolio Behaviour of Household  
3. Framework of Our Study  
4. Concepts and Definitions  
5. Data Sources  
6. Estimation of Variables  

**APPENDIX**

2.1 Rates of Return  
2.2 Deflators
Chapter Three: THE MODEL: REDUCED FORM EQUATIONS 113-223

1. Introduction 113
2. Model Presentation of Equations 122
3. General Remarks: A General Discussion of the Effects of Independent Variables on Saving Ratios 126
4. Description of Model A: A Detailed Description of the Effect of Independent Variables on the Composition of Saving and Total Saving 129
5. Description of Model B 166
6. An Analysis of the Relationship Between Composition of Saving and Growth 179
7. Conclusion 195

APPENDIX 197-223
3.1 Black Money 197
3.2 Effects of Gold 209

Chapter Four: AN ANALYSIS OF TRENDS IN VARIABLES AND RELATIONSHIP BETWEEN VARIABLES 224-307

1. Introduction 224
2. Trends in Endogenous Variables 224
3. Trends in Exogenous Variables 286
4. Relationship Between Variables 300

Chapter Five: AN EMPIRICAL ESTIMATE OF THE MODEL AND THEIR IMPLICATION 308-345

1. Introduction 308
2. Empirical Estimates of the Parameters of Model A 308
3. Empirical Estimates of the Parameters of Model B 337
4. An Empirical Analysis of Model C 340
5. Conclusion

Chapter Six: CONCLUSION

1. Introduction 346
2. Main Findings 346
3. Policy Prescriptions 357
4. Limitations 363

SELECT BIBLIOGRAPHY 364-385
