</table>
6.1 c Rice gross extent harvested (Acres): ‘Maha’ and ‘Yala’
6.1 f Growth Rate (GR) of Rice extent (acres), Yield (bushels per net acre) and Production (000’ bushels): Maha season
6.1 g Growth Rate (GR) of Rice extent (acres), Yield (bushels per net acres) and Production (000’ bushels): Yala season
6.2 a Annual tea production by tea grown areas: Million kg.
6.2 b Cultivated area of tea by districts (Gross Hectares)
6.2 c Average yield of tea (Kg. /hectares)
6.3 a Rubber production of Sri Lanka (M.T)
6.3 b Rubber average area extent hectares
6.3 c Linear Trends (equation) for Rubber Coverage: 1961-2001
6.3 d Average yield of rubber
6.4 a Coconut production in Sri Lanka: Million nuts
6.4 b Area Coverage of Coconut: 1962-1993
6.4 c Linear Trend of Coconut Coverage: 1963-1993
7.1 Correlation coefficient between paddy production (000’bushels) of Maha and Yala and corresponding Maha and Yala seasons rainfall (mm) and temperature(°C) : 1969-70 to 2000-2001
7.2 Linear regression equations for ‘Maha’ rainfall and temperature on paddy production: 1969 to 2001
7.3 Linear regression equations for ‘Yala’ rainfall and temperature on paddy production: 1969-70 to 2000-2001
7.4 Correlation coefficient between paddy coverage (Acres) of Maha and Yala and corresponding Maha and Yala seasons Rainfall (mm) and Temperature (°C) : 1969-2001
7.5 Linear regression equations for Maha rainfall and temperature on paddy area coverage: 1969-70 to 2000-2001
7.6 Linear regression equations for Yala rainfall and temperature on paddy area coverage: 1969-70 to 2000-2001
7.7 Correlation coefficient between tea production and corresponding annual average rainfall and temperature: 1970 to 2001
7.8 Regression analyses of annual average rainfall and temperature on tea production: 1970 to 2001
7.9 Correlation coefficient between tea area coverage and corresponding annual average rainfall and temperature: 1970 to 2001
7.10 Regression analyses of tea area coverage on annual average rainfall and temperature: 1970 to 2001
7.11 Correlation coefficient between annual average tea yield and
corresponding annual average rainfall and temperature: (1970-2001)

7.12 Regression analyses of annual average rainfall and temperature on tea yield: 1970 to 2001

7.13 Coconut area coverage and rainfall relationship: 1962 to 1993
7.14 Coconut area coverage and temperature relationship: 1962 to 1993
7.15 Linear regression equation of temperature on coconut area coverage: 1962 to 1993
7.16 Linear regression equation for rainfall on coconut area coverage: 1962 to 1993
7.17 Rubber area coverage and rainfall relationship: 1965 to 2000
7.18 Rubber area coverage and temperature relationship: 1965 to 2000
27.19 Linear regression equation for rainfall on rubber area coverage: 1965 to 2000
7.20 Linear regression equation for temperature on rubber area coverage: 1965 to 2000

8.1a Selected villages and percentage of the sample
8.1b Educational level
8.1c Monthly households income
8.1d Rain-fed tanks in the study area
8.1e Total operational holdings and self-owned: Acres
8.1f Monthly household income and total operational holdings
8.1g Weather effect on rice
8.1h Effect of rainfall, high temperature and other weather conditions on paddy cultivation in study area: 2003/2004
8.1i Reasons for, timely not getting rainfall
8.1j Total Rice Out-put: ‘Maha’ and ‘Yala’ seasons (Bushels)
8.1k Cultivating double/triple crops: ‘Maha’ and ‘Yala’
8.1l Coping with difficulties
8.2a Educational level
8.2b Employment Status and employment type
8.2c Monthly households’ income
8.2d Relationship between monthly household incomes and educational level
8.2e Total operational holdings and self-owned: Acres
8.2f Total tea out-put
8.2g Rainfall decreases: Affecting tea cultivation
8.2h Reasons for heat in summer
8.2i Drought damage percentage of tea production and events of weather disturbances
8.2j Effect of the drought damage on tea cultivation
8.2k Tea Yield Kg. / per year
8.2l Yield and operational holdings
8.2m Employment type and education level
8.2n Monthly household income and operational holdings
8.2o  Operational holdings and more cyclones, Storms, un-seasonal rains  258
8.2p  Relationship with operational holdings and heat in summer and rainfall decline affecting tea cultivation  258
8.3a  Educational level  260
8.3b  Monthly households' income  261
8.3c  Monthly household income and educational level  262
8.3d  Educational level and employment status  262
8.3e  Monthly household income and employment type  263
8.3f  Nature of the fishing activities  263
8.3g  Total fish production by money/year  264
8.3h  Total fish production  264
8.3i  Rainfall and other weather disturbances  265
8.3j  Coping with difficulties  265
8.3k  Government supports for fishing activities  266
8.3l  Total coconut nuts/ per year  266
8.3m  Total cost of production for coconut  267
8.3n  Weather Effects on Coconut  268
8.3o  Cope with difficulties  268
