III.2.11. Foraging studies 55
III.2.11.1. Nectar foraging in Bombax ceiba L. 55
III.2.11.2. Pollen foraging in Dillenia pentagyna L. 56
III.2.12. Pollen frequency determination 56
III.2.13. Studies on honey as an NWFP 56
IV. Results 58
IV.1. Honeybee Resources: Biology and Management 58
  IV.1.1. Diversity, comb architecture and host specificity of honeybees 58
    IV.1. 1. 1. Apis dorsata 60
    IV.1.1.2. Apis cerana indica F. 61
    IV.1.1.3. Apis florea F. 61
    IV.1. 1. 4. Trigona irridipennis 62
  IV.1.2. Annual bee management and commercial honey production 62
    IV.1.3. Beekeeping in Rubber plantations 65
    IV.1.4. Impact of Thai Sac brood Disease 66
    IV.1.5. Introduction of Apis mellifera 66
IV.2. Honey plant Resources: Biology and Management 67
  IV.2.1 Foraging 67
    IV.2.1.1. Nectar foraging and honey production 68
    IV.2.1.2. Nectar foraging on Bombax ceiba L. 69
    IV.2.1.2.1. Phenology 70
    IV.2.1.2.2. Nectar quantification 70
    IV.2.1.2.3. Quantification of flower productivity 71
    IV.2.1.2.4. Foraging behaviour for nectar and pollen 71
    IV.2.2 Pollen foraging and beebread production 74
    IV.2.2.1. Pollen foraging on Dillenia pentagyna L. 75
IV.2.2.1.1. Quantification of flower productivity 75
IV.2.2.1.2. Bee activity for pollen collection 75
IV.2.3. Pollen Analysis and Biological standardization 76
IV.2.3.1 Pollen characterization 78
IV.2.3.2 Pollen spectra of honey and pollen loads 93
IV.2.3.2.1. *Apis dorsata* honey (‘Thookkuthen’) 93
IV.2.3.2.2. *Apis cerana indica* honey (‘Thoduthen’) 95
IV.2.3.2.3. *Apis florea* honey (‘Cothen’) 109
IV.2.3.2.4. *Trigona iridipennis* honey (‘Cheruthen’) 109
IV.2.3.3. Resources for honey production 126
IV.2.4. Species diversity and relationships in honey samples 127
- A Cluster analysis 135
IV.3. Dietary preference of *Apis cerana indica* F. 135
IV.3.1. Species representation in pollen load samples 137
IV.4. Status, Prospects and patterns of Folk Apiculture 140
IV.4.1. Honey hunting 141
IV.4.2. Identification and classification 142
IV.4.3. Introduction of Beekeeping in tribal settlements 144
IV.4.4. Folk Apiculture of Kanikkars 145
IV.4.5. Honey Adulteration 146
IV.4.6. Use of antidotes 146
IV.4.7. Traditional uses of hive products 146
IV.5. Sustainable Utilization and Management of honey 147
as a Non-Wood Forest Product 147
IV.5.1. Honey – A unique NWFP 148
IV.5.2. Marketing Channel 149
IV.5.3. Honey extraction 150
IV.5.3.1. Extraction procedure 151
IV.5.4. Indigenous Management practices

V Discussion and Conclusion

V.1. Thematic foundations of the problem 154
V.2. Aspects and prospects of the present investigation 155
V.3. Introduction of Apis mellifera 158
V.4. Environmental impact of beekeeping 160
V.5. Notes on methodology 162
V.6. Honey plant resources 163
V.7. Dietary preference for pollen 169
V.8. Honeybees as crop pollinators 174
V.9. Honey as a Non-Wood Forest Product –
   Case study on Kanikkars 175
V.10. Management – Traditional and Modern 177
V.10.1. Strategies at primary level 180
V.10.2. Strategies at secondary level 181
V.11. Conclusions 183
