List of Tables

Table 3.1  Emission factors used for inventory preparation .................................................. 31
Table 3.2  Electricity exporting states, net export and percentage share of generation based on different fuels in 2002-03 .............................................................. 32
Table 3.3  Electricity importing states and net import in 2002-03 ........................................ 33
Table 3.4  Details of major electricity exporting states and generation pockets within these states .............................................................................................................. 41
Table 4.1  Details of emission from point sources and stack characteristics .......................... 62
Table 4.2  Mining details in the study domain ........................................................................ 63
Table 4.3  Vehicular density per day and emission factors used to estimate emissions from vehicular sources ....................................................................................... 64
Table 4.4  Fuel use according to the number of household in Korba District .......................... 64
Table 4.5  Monthly per capita quantity and value of consumption for non food items for Madhya Pradesh (Urban) ............................................................ 65
Table 4.6  Monthly per capita quantity and value of consumption for non food items for Madhya Pradesh (Rural) ........................................................................ 65
Table 4.7  Emission factors used to estimate emissions from domestic fuel burning ............. 66
Table 4.8  Estimated emission from domestic fuel burning over the study domain ................ 66
Table 4.9  Details about existing ash ponds in Korba ............................................................... 66
Table 4.10 Background concentration (in µg m⁻³) at Korba .................................................. 67
Table 4.11 Model performance with respect to selected statistical parameters .................... 74
Table 5.1  Human health effects of the Particulate Matter ..................................................... 88
Table 5.2  Compilation of CRFs (change in health impacts per 10 µg m⁻³ of the PM₁₀) mortality .................................................................................................................... 102
Table 5.3  CRFs for morbidity due to PM₁₀ according to Ostro (1996) (increment change in morbidity per 10µg m⁻³ of PM₁₀) ................................................. 103
Table 5.4  CRFs for morbidity due to PM₁₀ according to Mishra (2009) ............................... 103
Table 5.5  CRFs of morbidity health end points for which baseline prevalence rate of morbidity endpoints are available ......................................................... 104
Table 5.6  Value of statistical life from Indian studies ................................................................ 106
Table 5.7  Cost of illness according to Ostro (1996) study (in US $ per case) ........................ 108
Table 5.8  Cost of illness according to Mishra (2009) study for the year 2004 ....................... 109
Table 5.9  Cost of treatment of asthma (Rs/case/year) as per guidelines ......................... 109
Table 5.10  Cost of treatment of COPD (Rs/case/year) as per guidelines .......................... 109
Table 5.11  Cost of treatment (Rs/case/year) for the year 2004 estimated from
Murthy and Sastry (2005a and 2005b) study ................................................................. 109
Table 5.12  Estimated mortality cost per annum as a result of PM$_{10}$ in Korba .................. 113
Table 5.13  Estimated mortality cost per annum as a result of PM$_{10}$ contributed
by power plants in Korba .................................................................................................. 114
Table 5.14a  Estimated morbidity cost per annum as a result of PM$_{10}$ in Korba using
CRFs and COI from OSTRO (1996) (scenario 1) ............................................................. 115
Table 5.14b  Estimated morbidity cost per annum as a result of PM$_{10}$ in Korba using
CRFs and COI from Mishra (2009) (scenario 2) ............................................................. 116
Table 5.14c  Estimated morbidity cost per annum as a result of PM$_{10}$ in Korba
according to scenario 3 .................................................................................................... 116
Table 5.15  Estimated morbidity cost per annum as a result of PM$_{10}$ from power
plants in Korba .................................................................................................................. 116
Table 5.16  Estimated health damage cost per annum as a result of PM$_{10}$ from
power plants in Korba ...................................................................................................... 116
