ACKNOWLEDGEMENTS:

This research work duly recognise the contribution of various Scholars, Politicians, Economists, Bureaucrats, Steel experts and Government Officials for their writings, lectures, analyses which have been published in different places in different issues. But the uniqueness of this work is a complete view of steel industry in the post liberalised regime with theoretical and mathematical analyses, which would not have been possible without the constant support and monitoring by my Supervisor Dr. Soumendra Kishore Dutta, Professor of Economics, University of Burdwan. He is my constant source of inspiration.

I extremely indebted to my Co-supervisor Prof. Asit Kumar Banerjee, Professor, Department of Economics, University of Burdwan for his valuable guidance, support and inspiration. I must acknowledge my profound gratitude to them once again for raising my passion for analytical rigour and introducing me to the references needed for the analysis while preparing this work.

I have incurred the intellectual indebtedness to Mr. Nilotpal Roy, then Executive Director, Durgapur Steel Plant and present Managing Director of IISCO, Burnpur, for his valuable comments and constructive suggestion.

I like to put on record my acknowledgement of the help I got from the officials of Joint Plant Committee, a unit of Ministry of Steel for supplying me the data on steel from time to time.

I am grateful to the officers and staff of the library of Indian Statistical Institute for their cooperation; most of the financial data have been collected from Annual Survey of Industries and CMIE, ISI library is the major source of all those journals under the same roof.

However, I would like to own the whole responsibility for any error remaining in my study.

Date: 16. 7. 07.

(Debdas Karmakar)
