Acknowledgement

A thanks giving to every one contributed in my humble work.
A tribute to my grand parents who always prayed for my success in whatever I do.
A dedication to my parents who cherished my dreams, inspired me to achieve my goals, stood by me in all my struggles, and taught me to believe that small is beautiful.

This is a moment of fulfillment.
At this very special moment in life, lot of faces come to my mind who directly or indirectly helped me in my endeavour.

Some faces became part of history, but memories linger
Some are far away, but their help cannot be forgotten
Some are nearby and still continuing their help and support.

I take this moment to thank them all.

It is simply not possible to put the names of every one of them here.

But some are too important to ignore.
First, let me thank my guide and supervising teacher, Dr. V. Mathew Kurian for his wise guidance, parental attention and supportive attitude. The freedom in work is a blessing to any researcher and sir has given it in plenty.

Words are failing to express my gratitude to my husband and his family for their understanding and support.
