ACKNOWLEDGMENTS

The people who have been behind the scenes deserve much credit. I take a deep sense of pride to have worked with them. Expressions of indebtedness on black and white will not do justice to the amount of help rendered by each one of them.

A guiding light in any form is seen only by the blessed. I do consider myself truly blessed, for such has been the monumental role played by Dr. N. Ramanujam, Professor and Head, Post Graduate Department of Geology, V.O. Chidambaram College, Tuticorin. The support and encouragement given by him has been the driving force in achieving the set goals.

For all the support and guidance, I extend my gratitude to the institution, V.O. Chidambaram College as a whole, and especially to Hon. Secretary, A.P.C.V. Chockalingam, Former Principal, S. Duraiswamy, Principal R. Suriyanarayanan, and all the staff of P.G. Department of Geology.

Mr. V.R. Chitrapu, IFS, Principal Chief Conservator of Forests, Chennai, has to be thanked for granting me permission to carry out my research in the islands in the Gulf of Mannar.

The timely help rendered by Mr. T.S. Srinivasamurthi, IFS, Conservator of forests, Wildlife wing, southern region, Tirunelveli, and Mr. Ashok Uprethi, IFS, Wildlife Warden, Gulf of Mannar Marine National Park, Ramanathapuram, is kindly acknowledged.

Special thanks are due to Mr. V. Radhakrishnan and Mr. R. Thirugnana Sambanatham, for their invaluable expertise and guidance throughout the period of my study.

Expressions of thankfulness are due to Dr. C.V. Gokalarathnam, Head of Department, Dr. Shanthi Devanadhan, SEM In-charge, Metallurgy Department, I.I.T. Madras, Chennai, for helping me of avail the facilities at their department for the critical analysis of coral specimens by Scanning Electron Microscopy.
Mrs. Rama, Regional Sophisticated Laboratory, I.I.T. Madras, for carrying out the voluminous task of analysing specimen samples for heavy metal traces is kindly acknowledged.

X-ray Diffraction analysis of the coral specimens and sediment samples were carried out at CECRI, Karaikudi, with the help of Mr. A.Mani and K. Athinarayanswamy, for which I am ever indebted.

Help rendered by The Principal, Government Polytechnic, Tuticorin, is kindly acknowledged for helping me analyse the mechanical properties of corals.

I express my gratitude to Mr. Ramamoorthy, Regional Salt Testing Laboratory, Tuticorin, and The Head, Soil testing laboratory, Nagercoil, for their valuable work.

The favours done by The Dean, Fisheries College, and staff of CMFRI, Tuticorin and CMFRI, Ramanathapuram, with special mention to Dr. R. Raghavan, Fisheries College, Tuticorin, for helping me overcome a great disadvantage of being just a geology student doing work on coral reef sedimentation.

The paramount help rendered by my friend, colleague and brother Mr. H.M.Sabeen, deserves an applause so large that it should rock the very base of earth.

I extend my gratitude to Mr. Jesuraj, Mr. Muthukrishnan, Mr. Raveendran, CMFRI, for their valuable help in collecting reef samples and specimens and to Mr. Xavier, Taruvaikulam for arrangement of boat for transport of men and material to and from the islands.

Following friends require special mention for helping me in achieving the set goals, Dr. K. Sakthi Murugan, Mr. V.R. Sunil Kumar, Mr. A.S. Sudhir, Mr. Prasad, Mr. P.V. Sanil, Mr. T.S. Minish, Mr. S. Krishnamohan and Mr. Krishnakumar for all their help.

Various help rendered by my co-scholars, Mrs. N.B. Preeja and Mrs. V.R. Ambikadevi, is kindly acknowledged.
I express my gratitude to Mr. M.V. Vinodh, Mr. P.V. Sunil, Mr. V. Krishnakumar, Mr. Ajith for their invaluable help from time to time throughout the period of my study.

I thank Mr. Shanmugam and Mr. Ponnaiya and their family for the help and encouragement given to me throughout the period.

Special thanks to Mr. V.R. Raguraman, to have given life to this thesis.

Help rendered by Sri Balaji X-rays and Pearl city X-ray and diagnostic service institute, are dutifully acknowledged.

M/s Bhanu Studios, M/s J.S. Colour Lab, Tuticorin have done a wonderful job of taking of the photographs of coral specimens for which I am ever indebted.

I thank M/s Sapphire computers, Tuticorin for typing the manuscript.

I thank M/s Muki systems, Tuticorin for doing critical statistical analysis on the sediment samples.

I thank M/s Synchro Computers, Tuticorin, for making the thesis a beautiful presentation.

Thanks to my family as a whole and especially my Parents, my Brother, and my beloved Wife for having showered upon me the wonderous love and care and whose blessings has really helped me pull through this immense task. I thank each and everyone of them.

This is not just not a duty but a real gesture of thanks that I have extended to everyone who has taken that extra step and care to be with me. I have taken great care as to mention everyone, though I may have missed some, for which I curse my memory and once again thank the above unmentioned.
