ACKNOWLEDGEMENTS

The author wishes to extend his deep sense of gratitude and indebtedness to Dr. N. Ramanujam, Professor and Head, Postgraduate Department of Geology and Research Centre (DST FIST Sponsored Department), V.O.Chidambaram College, Tuticorin for the supervision and guidance rendered by him throughout the period of this work.

The author gratefully acknowledges the Indira Gandhi National Open University, New Delhi for granting permission and academic leave to pursue the research program.

The author wishes to thank the Management, especially the Secretary Mr. A.P.C.V. Chokalingam and the Principal Prof. R. Surianarayanan, V.O. Chidambaram College, Tuticorin for permitting him to carry out the research work in their reputed institution and providing him the necessary facilities for the same.

The author wishes thanks to the research scholars Mr. K. Nathakiri Murugan and Mr. A Antony Ravindran, for their help during the fieldwork. The author thanks Mr. A. Pradeep, Southern Electric Company for his active involvement in designing and fabricating the water level recorder used for the field experiments during the research work.

He is also thankful to his parents Mrs. & Mr. C.T. Rajan, wife Mrs. S. Muthulekshmi and son master S. Vishaal who cooperated, helped and encouraged him for the successful completion of the research work.
