Fig. 1 A- Vehicle Production in India & Projections 25
Fig. 1 B- Vehicle production other than passenger car 26
Fig.2 A- (Front suspension system – Modular) 38
Fig.2 B- Rear suspension system 39
Fig 2 C- Pictorial view of suspension working & Mounting 41
Fig 2 D- Tier level material flow & definition 46
Fig. 2 E -Storage functional view 50
Fig.2 F- Material flow view for dispatch 55
Fig.2 G- Warehousing storage & dispatch process 56
Fig2 H- Dispatch documents procedures 57
Fig 2 I- Material flow for job work 58
Fig.3A Supply chain in suspension system – pictorial view 64
Fig. 3 A-McLean’s IS success Model 1992 87
Fig.3 B Reformulated McLean’s IS success Model 2003 87
Fig.5A1 Pictorial of research design with reference of 1st hypothesis 152
Fig.5A2 Pictorial of research design with reference of 2nd hypothesis 155
Fig.5A3 Statistical Design 175
Fig 5 A – Pie chart of share of automation software 177
Fig 5 B- Automation software ageing pie chart 179
Fig.5C- Status of automation of customer demand intimation by pie chart 180
Fig. 5D Status of automation in receiving at gate 182
Fig. 5E Graph of Status of automation of invoicing at receipt stage 183
Fig.5F Status of automation at production floor 185
Fig. 5G material planning automation status chart 186
Fig. 5H Status of automation of FG stock 187
Fig. 5I Status of automation in supplier scheduling 189
Fig. 5J Status of overall automation pie chart 190
Fig.5k Graph of Automation role in better coordination 192
Fig.5L Graph of Automation effect in ITR improvement 194
Fig. 5M Graph of automation effect on timely delivery 197
Fig.5N Automation ability in reports of matrices 199
Fig. 5O Automation effect to find dead inventory 200
Fig. 5P Graph of Automation role in increasing visibility 204
Fig. 5 Q Graph of Automation role in conflict reduction 206
Fig 5 R Automation necessity to become competitive, graphical presentation 208
Fig 5 S Automation role in increasing customer satisfaction as per respondent views 210
Fig. 5 T Response in % -automation sustain difficulty 211
Fig. 5U Difficulties faced by user in automation 213
Fig. 5V Improvement desired in current software 214
Fig. 5X Share of improvement factor wise 217
Fig. 5Y Response on practical issue 218
Fig. 5Z Incidents automation as obstacle as percentage share 220
Fig. 6-A Automation stages of success model 253
Fig. 6-B Pre implementation stage 258
Fig. 6-C During implementation 267
Fig. 6-D Post implementation stage 289
