Abstract
Chapter 1   Objective of Research & Research Methodology
   1.1 Need of e-Learning
      1.1.1 An ideal environment for learning
      1.1.2 Application scenarios for e-Learning and Prerequisites
   1.2 The Importance of e-Learning
   1.3 Planning an e-learning system
      1.3.1 An ideal e-learning system Requirement
         1.3.1.1 Pedagogical requirements
         1.3.1.2 General Learning Theories
         1.3.1.3 Behaviorism of Learner
         1.3.1.4 Cognitivism of Learner
         1.3.1.5 Constructivism of Learner
         1.3.1.6 The BCC Together
         1.3.1.7 Learning Styles of the Learners
   1.4 Functional Requirements
      1.4.1 e-Learning Management Systems
      1.4.2 e-Learning Content Management Systems
      1.4.3 Learning and Tutorial Support Management
   1.5 Non-Functional Requirements
      1.5.1 Technical Requirements
      1.5.2 Support of operational environment required
      1.5.3 Interoperability and support of standards
      1.5.4 Ensuring of performance and scalability
      1.5.5 Security of e-learning systems
      1.5.6 Customizations
   1.6 Quality Requirements
Chapter 2    Study of Learning styles & e-Learning
2.1 Introduction to learning styles
2.2 Learning style models
   2.2.1 VAK learning style model
   2.2.2 Kolb's learning style model
   2.2.3 Honey and Mumford's learning style model
   2.2.4 Felder-Silverman model
2.3 Learning styles in e-learning
2.4 Criticism on learning styles
2.5 History & Background of e-learning
   2.5.1 The Instructor-Led Training Era (Early -1985)
   2.5.2 The Multimedia Era (1985-1995)
   2.5.3 The Web Infancy (1995-2000)
   2.5.4 Current Generation WorldWideWeb (2001 onwards)
2.6 E-learning & Information Technology
2.7 Foundation of e-learning
2.8 Current status of e-learning (India v/s Abroad)
   2.8.1 Social impact of e-learning
   2.8.2 Impact of e-learning on rural India
   2.8.3 Impact of e-learning on developing nations

Chapter 3    Analysis of e-learning methods
3.1 Asynchronous and Synchronous E-Learning
   3.1.1 Benefits and Limitations of Asynchronous E-Learning
   3.1.2 Benefits and Limitations of Synchronous E-Learning
   3.1.3 Cognitive and Personal Dimensions of E-Learning
3.2 Critical Analysis of Merits and Demerits of e-learning
   3.2.1 Merits of e-learning
      3.2.1.1 e-learning facilitates any where learning
3.2.1.2 e-learning facilitates any time learning
3.2.1.3 JIT (Just-In-Time) learning
3.2.1.4 Easy and fast distribution of learning material
3.2.1.5 Easy Dissemination of information
3.2.1.6 Volume Learning
3.2.1.7 Adaptive learning
3.2.1.8 Interactive learning through Multimedia
3.2.1.9 Web based learning
3.2.1.10 Estimating process of learning
3.2.1.11 Supervising process of learning
3.2.1.12 Estimating learner’s performance
3.2.1.13 Generating & Tracking Progress Report

3.2.2 Demerits of e-learning
3.2.2.1 No eye contact with teacher/trainer
3.2.2.2 Absence of body language of teacher/trainer
3.2.2.3 No Incentive of external training
3.2.2.4 Learning from a PC is unpleasant for eye and health
3.2.2.5 different learners take different time to finish courses
3.2.2.6 Difficulty in installation non-computer savvy person
3.2.2.7 Difficult to use learning management systems (LMS)
3.2.2.8 Understanding LMS is time consuming
3.2.2.9 LMS are very complex to configure
3.2.2.10 LMS are expensive
3.2.2.11 creation of e-learning courses is too expensive

3.3 E-learning v/s E-governance
3.4 Future scope of E-learning & E-governance

**Chapter 4**  **Design of Generalized E-Learning Model**

4.1 e-learning standards
4.2 Model of e-learning
   4.2.1 Demand Driven learning model
4.2.2 Community of Inquiry model
4.2.3 Modal e-learning model
4.2.4 DIY (Do-IT-Yourself) Model
4.2.5 E-learning Maturity Model
4.2.6 Technology Content and Service Model
4.2.7 Demand and supply model
4.2.8 Competency based model (problem, activation, demonstration, application and integration)

Chapter 5 Implementation using Learning Management System
5.1 Modular Object-Oriented Dynamic Learning Environment (Moodle)
   5.1.1 Modules and Blocks
   5.1.2 Moodle User Characteristics
5.2 Implementation of the courses using MOODLE
   5.2.1 Implementation for software engineering course
   5.2.2 Implementation for computer network course
   5.2.3 Implementation for operating systems course
   5.2.4 Implementation for Object Oriented Programming course

Chapter 6 Survey Results & Conclusion
6.1 Introduction to the surveys
6.2 VLE surveys
   6.2.1 Pre-survey on VLE
   6.2.2 Feedback survey on VLE
   6.2.3 Course surveys
6.3 Feedback survey
6.4 Learning style survey
6.5 Testing / validation of the model
6.6 Summary and Conclusion
6.7 Future aspect of pedagogy for e-Learning
6.8 Applicability of e-learning

Appendix (A – U) - Publications
