Acknowledgements

I would like to take this opportunity to express my deep and sincere thanks to a large number of other people without whose help this research would not have been possible. Foremost among them are my supervisors Dr Parameswar Banerjee and Professor Baidyanath Biswas. I have learnt technology, leadership and management from Dr Banerjee. He introduced me to the world of research activities and helped in gaining confidence. Professor Biswas taught me physics, hard work and imagination. It is their sincere help, support, patience and encouragement those made it possible for me to complete the research. I express my gratitude, thanks and regards to them.

Thanks and gratitude are due to Dr Debidas Mondal and Dr Partha Pratim Lahiri, once my teachers and now colleagues for their constant help, support, suggestions and encouragement even in the critical times. As a team, we shared successes and setbacks, long journeys, long discussions and long hours. Thanks again!

I convey my gratitude to Dr Bhupendra Swarup Mathur, former head of Time and Frequency Section at National Physical Laboratory, New Delhi for offering me the chance to work in his section. I convey my sincere gratitude to Dr Sudhir Ray, Professor Dilip Kumar Basu, Professor Bishnu Charan Sarkar, Dr Ajay Kumar Bhattacharya and Professor Santi Kumar Ray for their support and encouragement. Thanks and gratitude are due to Professor Ashis Dasgupta and his group of workers at Institute of Radiophysics and Electronics, Calcutta University for their help and support whenever necessary.

I convey my sincere thanks to staff members of Time and Frequency Section, National Physical Laboratory, New Delhi and Radionics Laboratory, Physics Department, Burdwan University for help; and support. I take this opportunity to convey my sincere thanks to Mr Anath Bandhu Ghosh for his help in compilation of this dissertation.
I convey my sincere thanks to the Head of the Department of Physics, Burdwan University. I am grateful to Ministry of Information Technology (MIT), (formerly Department of Electronics (DoE)) and Defence Research and Development Organisations (DRDO), Government of India for the financial assistance for the research work.

I must mention here the help, support and encouragement from my innumerable friends at New Delhi and Burdwan. They provided many help, encouragement and presented many golden moments. They are the people, for whom life is so enjoyable! Thank you all.

Finally, I would like to thank my family members. It is their love, sacrifice, fellowship, belief in me, sympathy - or lack thereof - as necessary, made me what I am. I could not have done this without them. Thank you all - more than I can say.

Date: 29 July, 2002

Burdwan
