Acknowledgement

By the grace of Almighty, who is the most beneficial and merciful, I've now got the opportunity to express my gratitude to all those who gave me the possibility to complete this thesis. After all those years, I've got quite a list of people who have accompanied and supported me and it is a pleasure to thank all of them.

I want to express my straight forward and sincere gratitude to my supervisor Professor M. Saleemuddin, co-ordinator, I. B. U., for his meticulous guidance, great support and understanding. He has provided invaluable criticism, advice, concern and encouragement in just the right proportions at every step which has enabled me to carry out this work successfully.

I extend my heartfelt gratitude to my teachers Dr. Owais, Dr. Rizwan Hasan Khan, Dr. Asad Ullah Khan, Dr. Saad Tayyab and others for giving me the power of knowledge which helped me made this endeavor possible. I am also thankful to Mr. Faisal Maqbool, Mr. Iqtedaar, Mr. Amir, Mr. Lal Md. and other members of non-teaching staff of the unit for their cooperation. University grant commission is gratefully acknowledged for providing the necessary financial assistance.

I would really want to thank my seniors Hina apa, Soghra apa and Abgeena apa for their selfless help and constant support. A journey is easier when is traveled together. This thesis is the end of my long journey and I cannot imagine it without the company of my friends. I would specially like to thank Shamila for always being there for me and never made me feel depressed or lonely. I am tempted to thank all my friends from childhood till now and some of them are Saba, Nida, Reema and Jaya.

No words can express my gratitude to my lab colleagues Atif, Iram, Barira apa, Akram, Shahper and Tahseen who took time off from their busy schedules to help me in the hour of need and made a friendly environment in the lab which made
me feel at home. I would also like to thank my junior research scholars for their help and cooperation.

I am heartily indebted to my parents for giving me the unconditional love and being by my side all of the time and to whom this thesis is dedicated. With a deep sense of love, I thank my brother, Salman for his constant help and inspirational backup. I am also thankful to my aunts, uncles and cousins specially Sofmaz apa and brother in law Rehan bhai for their care, love and support. Last but not the least I owe thanks to my husband, Konain for being so supportive and the incredible amount of patience he had with me for the last two years due to my research. I cannot forget to thank my in-laws for their understanding and encouragement which made possible to finish my work.
