LIST OF TABLES

3.1 Distribution of students and schools involved in the study
3.2 Distribution of the sample
3.3 Weight-age in terms of objectives (pilot study)
3.4 Weight-age in terms of content (pilot Study)
3.5 Blue print achievement test (Pilot Study)
3.6 Indices of Item Discrimination
3.7 Weightage in terms of objectives (Final study)
3.8 Weightage in terms of content (Final study)
3.9 Blue print achievement test (Final study)
4.1 Means and Standard Deviations of Mental Health of High School Students
4.2 Means and Standard Deviations of Scientific Aptitude of high school Students
4.3 Means and Standard Deviations of Level of Reasoning of Scientific Aptitude of High School Students
4.4 Means and Standard Deviations of Level of Numerical Ability of Scientific Aptitude
4.5 Means and Standard Deviation of Level of Science Information of Scientific Aptitude of High School Students
4.6 Means and Standard Deviations of Level of Science Vocabulary of Scientific Aptitude of High School Students
4.7 Means and Standard Deviation of Achievement in Science of High School Students
4.8 ANOVA Table – “F” Value for the Mental Health of High School Students
4.9 Significance of Difference between the Means of the Sub Sample of Mental Health of High School Students
4.10 ANOVA Table – “F” Value for the Scientific Aptitude of High School Students
4.11 Significance of Difference between the Mean of the Sub Sample of Scientific Aptitude of High School Students
4.12 ANOVA Table – “F” Value for the Level of Reasoning of Scientific Aptitude of High School Students
4.13 Significance of Difference between the Mean of the Sub Sample of Scientific Aptitude on Reasoning Test of High School Students
4.14 ANOVA Table – “F” Values for the Level of Numerical Ability of Scientific Aptitude of High School Students
4.15 Significance of Difference between the Mean of the Sub Sample of Scientific Aptitude on Numerical Ability of High School Students
4.16 ANOVA Table – “F” Value for the Level of Science Information of Scientific Aptitude of High School Students
4.17 Significance of Difference between the Mean of the Sub Sample of Scientific Aptitude on Science Information Test of High School Students
4.18 ANOVA Table - “F” Value for the Level of Science Vocabulary of Scientific Aptitude of High School Students
4.19 Significance of Difference between the Mean of the Sub Sample of Scientific Aptitude on Science Vocabulary Test of High School Students
4.20 ANOVA Table – “F” Value for the Achievement in Science of High School Students
4.21 Significance of Difference between the Mean of the Sub Sample of Achievement in Science in High School Students
4.22 Co-Efficient of Correlation (R) between Achievement in Science and Mental Health with Selected Variables

4.23 Co-Efficient of Correlation (R) between Achievement in Science and Scientific Aptitude with Selected Variables

4.24 Co-Efficient of Correlation (R) between Achievement in Science and Level of Reasoning of Scientific Aptitude with Selected Variables

4.25 Co-Efficient of Correlation (R) between Achievement in Science and Level of Numerical Ability of Scientific Aptitude with Selected Variables

4.26 Co-Efficient of Correlation (R) between Achievement in Science and Level of Science Information of Scientific Aptitude with Selected Variables

4.27 Co-Efficient of Correlation (R) between Achievement in Science and Level of Science Vocabulary of Scientific Aptitude with Selected Variables

4.28 Pooled Within-Groups Correlations between Discriminating Variables and Standardized Canonical Discriminant Functions Variables Ordered By Absolute Size of Correlation within Function

4.29 Standardized Canonical Discriminant Function Coefficients

4.30 Functions at Group Centroids

4.31 Classification of Results- Original Count and Predicted Group Membership
LIST OF FIGURES

3.1 Pie Diagram showing the Distribution of the sample – Gender
3.2 Pie Diagram showing the Distribution of the sample – Religion
3.3 Pie Diagram showing the Distribution of the sample – Students Residence
3.4 Pie Diagram showing the Distribution of the sample – Father’s Education
3.5 Pie Diagram showing the Distribution of the sample – Father’s Occupation
3.6 Pie Diagram showing the Distribution of the sample – Mother’s Education
3.7 Pie Diagram showing the Distribution of the sample – Mother’s Occupation
3.8 Pie Diagram showing the Distribution of the sample – Parents Income per month
3.9 Pie Diagram showing the Distribution of the sample – Total Number of Members in a Family
3.10 Pie Diagram showing the Distribution of the sample – Type of School
4.01 Plot of three Group Centroids on the two discriminant functions derived from five independent variables
4.02 Bar Diagram for Original Count and Predicted Group membership of Achievement in Science of High School Students
