CONTENTS

ABSTRACT

CHAPTER I, INTRODUCTION

1.1 Introduction
1.2 Location and accessibility
1.3 The Problem
1.4 Objectives and purpose
1.5 Methodology
  1.5.1 Collection of literature
  1.5.2 Designing a database
  1.5.3 Field survey
  1.5.4 Analytical methods

CHAPTER II, PREVIOUS LITERATURE

2.1 Review of literature on Nongpoh Granite
2.2 Review of literature on Granites and Granitic rocks

CHAPTER III, GENERAL GEOLOGY

3.1 Introduction
3.2 Outcrop
3.3 Drainage
3.4 Weathering
3.5 Climate

CHAPTER IV, GEOLOGICAL SETTING

4.1 Regional Geological Setting
4.2 Rock types of the area
  4.2.1 Gneisses
  4.2.2 Enclaves
    4.2.2.1 Hornblende biotite gneiss enclaves
    4.2.2.2 Dioritic enclaves
    4.2.2.3 Quartzofeldspathic gneiss enclaves
    4.2.2.4 Micaceous schleirens
  4.2.3 Granites and its derivatives
    4.2.3.1 Porphyritic granite
    4.2.3.2 Coarse grained granite
    4.2.3.3 Medium grained granite
    4.2.3.4 Fine grained granite (aplitic type)
CHAPTER V STRUCTURAL FEATURES

5.1 Introduction
5.2 Structural features in Granites
5.2.1 Flow layers
5.2.2 Flow lines
5.2.3 Joints
5.2.4 Shear zones
5.3 Structural features in the country rock and enclaves
5.3.1 Folds
5.3.2 Pinch and swell structure
5.3.3 Joints

CHAPTER VI PETROGRAPHY

6.1 Introduction
6.2 Granites
6.2.1 Porphyritic granite
6.2.2 Coarse grained granite
6.2.3 Medium grained granite
6.2.4 Fine grained granite (aplitic type)
6.2.5 Pegmatites
6.3 Enclaves
6.3.1 Introduction
6.3.2 Hornblende biotite gneiss
6.3.3 Quartzofeldspathic gneiss
6.3.4 Dioritic rocks

CHAPTER VII GEOCHEMISTRY

7.1 Introduction
7.2 Geochemistry of the Granites
7.2.1 Introduction
7.2.2 Sampling and analytical methods
7.2.3 Chemical composition
7.2.4 Comparative chemistry and geochemical trends
7.2.5 Tectonic implications
7.3 Geochemistry of the Enclaves
