ACKNOWLEDGEMENT

With a deep sense of respect I acknowledge Prof. N.K. Baishya, Department of Chemistry, Gauhati University, my teacher and guide, for his generous blessings and valuable guidance throughout the long course of this investigation.

I am ever grateful to my friend and my guide, Dr. P.C. Borthakur, Head, Material Science Division, Regional Research Laboratory, Jorhat, who motivated me to the challenging task of undertaking research work in the fields of clay and cement, for his constant encouragement, invaluable criticism and, above all, the untiring guidance in my pursuit of the research activity.

I am indebted to Dr. J.S. Sandhu, Director, Regional Research Laboratory, Jorhat, who has kindly permitted me to complete the research work at the laboratories under his command. I am grateful as well to all past directors of RRL, Jorhat, who graced the chair since 1991, for their valuable help to me during their terms in office.

I acknowledge sincere thanks to Shri A.C. Saikia, Principal i/c, Dergaon Kamal Dowerah College, Dergaon, who, in addition to continuous inspiration and help, allowed me to carry on the research work till completion. I also convey my gratitude to Shri N.P. Phookan, Shri D.N. Bhattacharyya and Shri G.C.S. Bordoloi, the former principals of the college, who had kindly granted me permission to pursue the work while they were in office.

I expressed heartfelt gratitude to each and every member of the staff and the scientists working in the Material Science Division, Regional Research Laboratory, Jorhat, and, in particular, to Shri P.C. Saikia, Shri R.L. Goswamee and Shri Nabajyoti Saikia, for their help in my hour of need.

I am particularly thankful to Ms Niroda Bora of the Material Science Division, who, with her ever-smiling graces and all inspiring words worked relentlessly and overtime to go through the manuscript and prepare the final, ready-to-print, copy of the thesis.
I express sincere gratitude to Dr. R.K. Baruah, Scientist, Analytical Chemistry Division, RRL, Jorhat, for the help he rendered in carrying out my X-ray investigations. I am grateful to Shri C.S. Bordoloi, Technical Officer, P&I Division, RRL, Jorhat, for the invaluable service he extended in preparation of the thesis.

I am thankful to my colleagues in general, at my place of work, Degaon Kamal Dowerah College, Dergaon, and especially to those at the Department of Chemistry of the college, for their co-operation and encouragement during the long course of my research work.

I acknowledge thankfully. Dr. N. Thakur, Department of Assamese, Gauhati University for the help he extended during the course of my investigation.

Last, but not the least, I am grateful to all the members of my family, my wife Tulu and my mother in particular, who, in addition to their never-ending inspirations, relieved me of the domestic affairs to devote fully to the work.

Finally, I acknowledge every one who had helped and inspired me in any form to carry out the work to completion.

Date: June 12, 2000
