ACKNOWLEDGEMENT

I am indebted to my supervisor Prof. S. B. Nandi, Head of the Department of Statistics, Gauhati University, for his constructive interest in my work, valuable guidance and constant encouragement.

I am grateful to Prof. A. M. Goon, Head of the Department of Statistics, Presidency College, Calcutta, for his encouragement and also for providing the facilities that were necessary for completing this work.

I also express my gratitude to Dr. J. Medhi, Emeritus Professor of Gauhati University, for taking interest in my work.

Thanks are also due to my colleagues at the Department of Statistics, Presidency College, Calcutta, and to my friends and teachers at the Department of Statistics, Gauhati University, as well as to those at the S.O.C. & O.R. unit, Indian Statistical Institute, Calcutta, for many helpful discussions that I had with them.

I take this opportunity to thank the Association for the Advancement of Modelling and Simulation Techniques in Enterprises (AMSE) of France for allowing me to present a paper that incorporates some findings of my thesis at the International AMSE Conference on "Signals, Data and System" held in Calcutta in 1992.

My thanks are also due to the organizers of the workshop on the topic "Inferences in Finite Populations" held at the Indian Statistical Institute, Calcutta, in November, 1993, which significantly improved my knowledge of the subject of Sample Survey.

Finally, it is a pleasure to acknowledge the moral support of the members of my family during the entire period of the preparation of this thesis.

Ashit Baran Aich

Presidency College, Calcutta
