ACKNOWLEDGEMENT

I feel privileged to record my profound sense of gratitude and indebtedness to my research supervisor Dr. Pranita Sarmah, Professor, Department of Statistics, Gauhati University, Guwahati, for her valuable guidance, unfailing assistance and encouragement, and unwavering patience throughout the period of this research. Her magnanimity and constant support have been invaluable in the materialization of this work. I am truly blessed to have her as my guide.

The awareness on mental illnesses and the motivation to work on schizophrenia from a statistical perspective came from the discussions I have had from time to time with Dr. H.R.Phookun, Professor of Psychiatry, Gauhati Medical College Hospital, Guwahati. I would like to express my sincere gratefulness to him for his immense help, guidance and inspiration throughout this study. This work would not have been possible without him.

I am grateful to the Principal, Gauhati Medical College Hospital, for granting me the permission to use the data available in the Department of Psychiatry of the Institution, for my study.

A follow-up study of a group of schizophrenic patients was carried out in association with Dr. H.R.Phookun, Dr. P Sarma and Dr. S.K.Talukdar, reputed Psychiatrists of Guwahati, for the purpose of this research. I offer my sincere thanks to them.

I acknowledge the assistance provided to me by the Ministry of Statistics and Programme Implementation, Central Statistical Organization, Government of India, by granting me a Doctoral Fellowship under the plan
scheme “Awards and Fellowships for Outstanding and Meritorious Research work in Statistics”.

I am grateful to the Principal, Cotton College, and the Commissioner, Department of Education (Higher), Government of Assam, for granting me permission and leave to carry out my research.

I would be failing in my duties if I do not acknowledge the inspiration and cooperation provided to me by Prof. Kamala Chaudhury, Head of the Department of Statistics, Cotton College, Guwahati, and all other faculty members of the department.

I offer my gratitude to Prof. H.K. Baruah, Dean, Faculty of Science and Head, Department of Statistics and all other faculty members of the Department of Statistics, Gauhati University, for the interest shown and the help and encouragement offered to me during the course of this research work.

I also offer my deep regards to Dr. S.N. Sarmah, Retired Principal, Goalpara College, Goalpara, Assam, for his genuine concern and priceless advice in this pursuit.

My sincere thanks to Bandana Sharma, Amit Chaudhury, Dip Bhuyan, Sangita Pandey and all other friends who have been so important in the preparation of this thesis.

I am indebted to my husband Mr. Sreemant Phukan for his immense help, advice and moral support in this long sojourn. Also, I cannot but acknowledge the interest, active assistance and valuable suggestions offered by my brother, Dr. Devasish Barthakur and my sister-in-law Meenakshi. Without them, this endeavour of mine would perhaps, not have been possible.
I am highly grateful to my parents-in-law, my mother and all my relatives, especially Runjun, Devajyoti, Tribeni, Indrani and Sanjay, for their constant encouragement, support and the many little, yet precious, contributions they have made during these arduous years. My son Aarjav deserves special thanks for bearing up with me and being always by my side during this period.

To my father, late B. N. Sarma Barthakur, my research work was a beautiful dream he cherished, but could not see it being completed during his lifetime. His love and inspiration made me what I am today. I dedicate this work to his omnipresent memory.

(Sangeeta Barthakur)
