ACKNOWLEDGMENTS

I wish to express my deepest sense of gratitude and obligation to Dr. G. O. Deka, M.Sc. (Cal), Ph.D. (Bristol), Investigator-in-charge, D.A.E. Project, Cotton College, Guwahati, for giving me all facilities and valuable guidance in carrying out my research work in his laboratory.

I acknowledge my sincere thanks to Prof. W. O. Joliot of CERN, Geneva, for his gracious loan of the NIKFI-R emulsion stack and also to Dr. R. R. Daniel of TIFR, Bombay, for his kindness in lending two GB emulsion stacks exposed to 3.5 and 4.5 GeV/c negative pions and two emulsion plates exposed to 17 GeV/c negative pions.

I also take this opportunity to thank Dr. R. R. Daniel, Dr. Yash Pal and other members of the emulsion group of TIFR, for the valuable discussions I had with them in regard to my research work. I am grateful to the authority of TIFR, for giving me all facilities to work for about a month as a guest worker in the emulsion group, where I could avail the chance to have a first hand knowledge of the processing and development of emulsion and also to know the techniques of measurement related to my investigation.

My thanks are due to the Government of Assam for its financial assistance without which it would have been difficult to maintain the research project. I am also
obliged to the authority of U.G.C. for the loan granted to me for getting books and journals.

I owe special thanks to Dr.K.Pathak, M.Sc., Ph.D. and Dr.K.C.Deka, M.Sc., D.Phil. of the Department of Physics, Cotton College, and also to Dr.K.M.Pathak, M.Sc., Ph.D. and Dr.T.D.Goswami, M.Sc., D.Phil., Department of Physics, University of Gauhati, for their valuable suggestions and keen interest which prompted me to work with zeal and endeavour. I also acknowledge my thanks with pleasure to my colleagues for the help I received from them in various ways in completing my work.

Last but not least, I would like to offer my sincere thanks to Mr.B.Das and Mr.U.Das for taking pain in doing the scanning works for me and to Mr.K.Das and M. Lakshman for their careful typing of the thesis.
