CHAPTER 1 INTRODUCTION
1.1 Role of rivers in the Environment 1
1.2 Pollution in Inland waters 3
1.3 Ion transport by Rivers 4
1.4 Mobility of Dissolved Trace Metals 6
1.5 Effect of Contaminants in hydrological regime 8
1.6 Status of contaminants in World Rivers 11
1.7 Status of contaminants in Indian Rivers 12
1.8 Aims and Objectives of the present work 14

CHAPTER 2 THE STUDY AREA AND METHODOLOGY 16
2.1 The Siang River System 16
2.2 Physiography 17
2.3 Stratigraphy 17
2.4 Climate 19
2.5 Soils 20
2.6 The area under Study 20
2.7 Water and sediment sampling 21
   2.7.1 Sampling sites and sampling frequency 21
   2.7.2 Sampling procedure 23
   2.7.3 Sample pre-treatment and preservation 23
   2.7.4 Analytical procedure for water 25
   2.7.5 Analytical procedure for sediment characterization 28
   2.7.6 Total metals in sediments 31
2.7.7 Metal contents of different size fractions of sediments 32
2.7.8 Clay Minerals 34
2.7.9 XRD measurements 34
2.7.10 IR measurements 34
2.7.11 Speciation Procedure 35
2.7.12 Sorption studies (Cu2+, Cr, Pb2+, and Zn2+). 36

CHAPTER 3 CHEMISTRY OF RIVER WATER 39
3.1 Introduction 39
3.2 Physico-chemical parameters 39
3.2.1 Temperature 39
3.2.2 Dissolved Oxygen (DO) 41
3.2.3 pH 43
3.2.4 Electrical conductance (EC) 45
3.2.5 Solids in water 47
3.2.6 Total Hardness 52
3.2.7 Ammonia-N 53
3.2.8 Free Carbon dioxide 56
3.3 Major ion Chemistry 59
3.3.1 Sodium and Potassium 59
3.3.2 Calcium and magnesium 62
3.3.3 Aluminium and Iron 65
3.3.4 Chloride 68
3.3.5 Phosphate 72
3.3.6 Fluoride 74
3.3.7 Sulphate 75
3.3.8 Bicarbonate and weathering pattern 78
3.3.9 Dissolve silica 88
3.3.10 Major ion equivalence 93
3.4 Metal distribution in water column 98
3.4.1 Cadmium 99
3.4.2 Cobalt 100
3.4.3 Copper 102
