Acknowledgments.

This work is an attempt to measure the extent and time-pattern of the change of inter district disparities in the overall and sectoral socio-economic behaviour in the Brahmaputra Valley during the period 1990-91 and 2000-01.

In the preparation of this thesis, I sincerely acknowledge my esteemed guide and supervisor Dr. A. Saikia, Reader, Department of Geography, Gauhati University for his valuable support and constant encouragement, provocation for thinking and rethinking and his very sincere guidance from the beginning till the end of this task. It is mainly because of him that I could complete my work within the time. Besides he had given me full autonomy in conducting my research.

I am also thankful to the principal and other staff member of my college for their suggestions and encouragement during the study.

I am also thankful to librarians of various libraries like K.K.H. library, Gauhati University, OKD library, Guwahati, Guwahati College library, Shiksha Educational Trust library, Guwahati which stock I made use of.

I am highly indebted to A.S Tapadar, Trustee, Shiksha Educational Trust and Mrs. Dipika Deka, Principal Shiksha Public School, Guwahati for taking all the pains to enable me to face the various odds in my career.

I am also grateful to Prof. Pasumiddin Ahmed, former head of the department, Pragjyotish College, Guwahati, for his valuable suggestions on the study from time to time.

I shall be failing in my duty unless I extend my thanks to my parents Md. Tahidur Rahman and Mrs. Fatema Begum for their cooperation, inspiring words and wishful ambition, I also express my gratitude to my brother, sister and friends for their kind encouragement. My thanks also goes to Mr. Dhiru Kalita for helping me in computer works.

Department of Geography
Guwahati College.

(Md. Safiquz Rahman)
