CONTENTS

Chapter 1  Introduction                      Page No:

Abstract                                             1

1.0  Introduction                                    2

1.1  Heterogeneous Catalysis                        2

1.2  Smectites                                       5

1.3  Smectite Structures                            5

1.4  Properties of Smectites                        8

1.5  Pillared Clays                                  10

1.6  Characteristics of Pillared Clays               12

1.7  Acidity of Pillared Clays                       15

1.8  Pillaring Agents                                17

1.9  Aluminium Pillared Clays                       17

1.10  Iron Pillared Clays                            20

1.11  Iron Aluminium Pillared Clays                  21

1.12  Pillared Clays as Catalyst Supports            22

1.13  Reactions Selected for the Present Study       24

1.14  Main Objectives of the Present Work            26

References                                           27

Chapter 2  Materials and Methods

Abstract                                             38

2.0  Introduction                                    39

2.1  Preparation of Catalysts                       39

2.1.1  Preparation of Pillared Montmorillonites      40
Chapter 3  Physicochemical Characterisation

Abstract  

3.0  Introduction  

3.1.1  Cation Exchange Capacity  

3.1.2  Energy Dispersive X-Ray Analysis  

3.1.3  Surface Area and Pore Volume Measurements  

3.1.4  X-Ray Diffraction  

3.1.5  Fourier Transform Infrared Spectroscopy
### Chapter 3.1

- **3.1.6** $^{27}$Al NMR Spectroscopy .................................................. 75
- **3.1.7** $^{29}$Si NMR Spectroscopy .................................................. 78
- **3.1.8** Thermogravimetry .............................................................. 82
- **3.1.9** UV Diffuse Reflectance Spectroscopy .................................... 84
- **3.1.10** Scanning Electron Microscopy .......................................... 86
- **3.2** Acidity of Pillared Clays ....................................................... 88
- **3.2.1** TPD of Ammonia ................................................................. 88
- **3.2.2** Perylene Adsorption Measurements .................................... 94
- **3.2.3** Cumene Cracking ............................................................... 97
- **3.2.3.1** Catalytic Activity of Various Systems ................................. 98
- **3.2.3.2** Effect of Reaction Variables .......................................... 102
- **3.2.4** Cyclohexanol Decomposition ............................................. 104
- **3.2.4.1** Catalytic Activity of Various Systems ................................. 106
- **3.2.4.2** Effect of Reaction Variables .......................................... 108
- **3.3** Conclusions ........................................................................... 111
- **References** .................................................................................. 114

### Chapter 4

**Friedel Crafts Alkylation**

- **Abstract** ..................................................................................... 118
- **4.0** Introduction .......................................................................... 119
- **4.1** Benzylation of Benzene with Benzyl Chloride ............................ 121
- **4.1.1** Catalytic Activity of Various Systems .................................. 123
- **4.1.2.a** Structural Stability of the Catalysts .................................. 130
- **4.1.3.a** Effect of Reaction Variables ........................................... 132
- **4.1.2.b** Structural Stability of the Catalysts .................................. 140
- **4.1.3.b** Effect of Reaction Variables ........................................... 142
- **4.1.4** Mechanism of the Reaction .............................................. 146

Chapter 6  MTBE Synthesis

Abstract  221
6.0 Introduction  222
6.1 Catalytic Activity of Various Systems  224
6.2 Effect of Reaction Variables  231
6.3 Mechanism of the Reaction  235
6.4 Conclusions  236
References  237

Chapter 7  Summary and Conclusions

Abstract  239
7.0 Introduction  240
7.1 Summary of the Work  240
7.2 Conclusions  242
7.3 Future Outlook  244
