Acknowledgement

I thank almighty to walk along with me in all difficult phases of journey of research and surrounding me with positive people and energy. A project like final synopsis is never possible to complete without the help, guidance, cooperation and support of a number of individuals whom you work or live with. My endeavor is no exception to this. I owe a lot to many persons in reaching the stage of completion of my investigation.

The most pivotal and catalytic role in Ph.D. degree related research is that of the guide. I have been lucky to have been accepted as a research scholar by such an eminent scholar and above all a great human being as Dr. Shri Prakash, Prof of Eminence, Centre of Research Studies BIMTECH, Greater Noida. He has been a grand tower like source of inspiration, help and support. Without his unflinching and continuous guidance and support, I would have not been able even to initiate this research study. I do not have adequate words to express my gratitude. He is a great thinker, philosopher and teacher who guided me at each step of my research. I always get inspiration from his life and works.

I would like to show my gratitude to Dr Harivansh Chaturvedi , Director BIMTECH for providing me all necessary support as well as motivation to pursue my Doctoral studies. My special thanks to Dr Sahay ,Dean of Centre of Research Studies , BIMTECH who has been patient of hearing all our internal presentation and adding value to my thesis. I would like to thank other faculty members of BIMTECH for their guidance and valuable suggestions during each presentation which helped me to enhance the quality of my work .I am obliged to many of my fellow researchers who supported me all through my journey of research.
I owe sincere and earnest thankfulness to my husband, Gaurav Arora who always motivated me to pursue my research work. He has taken great care of family in my absence from home. He always encouraged me with lot of affection and care without which I would have not been able to accomplish this task. He taught me to handle Excel files with perfection. I am also thankful to my parents, Vinod Kumar Bhatia and Asha Bhatia for their unconditional and moral support. I am also thankful to my six year old son Aryan Arora who sacrificed his valuable childhood time to enable his mother to do research.

Dr Rishi Tiwari, Librarian, BIMTECH has been a great help in accessing relevant material for my research. He and his staff deserve special words of thanks.

Mr Ajeet Singh Rauthan, Astt Manager, Centre for Research Studies, BIMTECH has lent a great deal of help in data analysis. I would also like to thank Abhilasha, secretary and canteen staff of BIMTECH who have directly or indirectly in some way contributed to completion of this thesis.

Chitra Bhatia Arora
