List of tables:
Table: 3.1 Photo-physical properties of lithium metal complexes.
Table: 3.2 PL of Liq in different solvents.
Table: 3.3 PL of LiClq in different solvents.
Table: 3.4 PL of LiCl2q in different solvents.
Table: 3.5 PL of LiMeq in different solvents.
Table: 3.6 PL of LiMe2q in different solvents.
Table: 3.7 Maximum luminescence and current values of the devices having different materials as EIL.
Table: 3.8 Maximum current, luminescence and efficiencies values of Liq doped Alq3 as ETL.
Table: 3.9 Maximum current, luminescence and efficiencies values of LiClq doped Alq3 as ETL.
Table: 3.10 Maximum current, luminescence and efficiencies values of LiCl2q doped Alq3 as ETL.
Table: 3.11 Maximum current, luminescence and efficiencies values of LiMeq doped Alq3 as ETL.
Table: 3.12 Maximum current, luminescence and efficiencies values of LiMe2q doped Alq3 as ETL.
Table 4.1 Photo-physical properties of zinc metal complexes
Table 4.2: Comparative CE and PE of the devices having zinc and aluminum complexes as ETL
Table 5.1 Photo-physical properties of iridium metal complexes
