ACKNOWLEDGEMENT

I owe the completion of this thesis to quite a number of people who have done a great deal, directly and indirectly to my completion of this work in important ways. I wish to place on record my heartfelt gratitude to all of them in a way by fitting the immensity of their help.

First of all my deepest gratitude to Dr. A.V. Kulkarni, who has been more than just my research guide. In spite of his busy schedule he had shown immense interest in my work. I am highly indebted to him for having faith in me and for his wholehearted support, encouragement and valuable guidance.

I would like to convey my sincere thanks to Mrs. Kulkarni for her motherly attitude and motivation.

I extend my sincere gratitude to my H.O.D. Dr. MSVK. Raju (Dept of Psychiatry, Bharati hospital), and Dr. Mrs Deshmukh (Gynac, Bharati Hosp.) for constant encouragement for the completion of this work.

My heartfelt gratitude to Late. Dr. C.V.Gore, for the help he rendered me not only in doing the statistics but also during the later stages of this work.

I also wish to express my gratitude to Yoshita and Harshita, for the help they rendered me during all stages of this work.

My gratitude must go to my mother and brothers who were my inspirations and strength for this endeavor. I also extend my thanks to my parent- in- law for their cooperation.

My utmost gratitude to my husband, Mahesh who stood with me through all the ups and downs of this important phase in my life and for having strong faith and belief in me.

My gratitude must go to my beloved 5 yrs old son Ayush, who sacrificed his attachment to mother and allowed me to use his time for the completion of the work.

Last but not the least, I wish to convey my gratitude to many others who have helped me either directly or indirectly to complete this thesis.
