ACKNOWLEDGEMENTS

Slow are the hours for those who are suffering,
Fast for those who are enjoying.

It is amazing. I hardly can believe that 4 years and a half have passed since I have started my research in this department. People often say that “it feels like yesterday”. Guys, it really feels like I started yesterday this adventure. Time is relative, indeed. Famous authors and scientists said that time runs fast when you enjoy what you do and what happens around you. It has been a significant period, an unforgettable experience for me and for several friends I had the luck to meet here. To them all this thesis is dedicated.

It gives me a great pleasure to express my deep sense of gratitude and indebtedness to Dr G. K. Solanki, who remained for me not only a supervisor but also as real Philosopher and guide. I would never have been raided a single step without his precious, inspiring, encouraging and valuable guidance in the trying period of my research endeavor, without which it would have been quite impossible to complete my Thesis. The words are always short to express my gratitude towards him.

I am extremely grateful to Prof. A. R. Jani (Head of the Department) & Prof. K. N. Joshipura, (Former Head), Department of Physics, Sardar Patel University, Vallabh Vidyanagar, for his kind support and encouragement during this work. Thanks are also to the authority of Sardar Patel University for providing me all necessary facilities.

I wish to record my whole hearted thanks to Prof. V. M. Pathak, Dr. K. D. Patel for his positive inspiring efforts and kind co-operation throughout the duration of the present investigations.

The help received from SICART (Sophisticated Instrumentation Centre for Applied Research and Technology) and USIC (University Science and Instrumentation Centre) is gratefully acknowledged.

I heartily thankful to Dr. Amit Patel for his co-operation for High pressure experimental work.

I also wish to express my feelings of extremely heartfelt thanks to my research colleagues Dipika, Trupti, Ruchita, Nitin, Rahul, Vimal, Mayur, Keyur and Haresh.

SANDIP R. UNADKAT ~ 2012
Friends are always a source of encouragement and form a fabric of friendship through which some good work may have cultivating boost. Hence I wish to record the words of hearty thanks for Sahaj, Tanvir, Bindiya, Rinkesh, Pravin, Nilesh, Sumona, Deepadidi, Sandip, Sherin, Priyanka V.P., Shreelatha, Nitya, Pooja and Pallavi.

The contribution of the non-teaching and supporting staff of the department is unforgettable; I also express my deep gratitude for them.

I extend my sincere thanks to Prof. Bhargav Goradiya, (Head, ET Department, B.V.M Engineering College, Vallabh Vidyanagar) and all colleague staff members for their constant encouragement.

I would like to dedicate these few last words to my family. It has been such a difficult period for us. So many, too many, bad things happened during the last four years. I wish I could have completed this adventure in completely different circumstances. The support and pride of my father, my brother Jatin and my sister Falguni were (and are) very important for me. Their blessings lives in between these pages and it will always accompany me during my future. To my mother are dedicated these last few lines. “We had to go through difficulties, but I am proud that we managed. You have always believed in me during my study. In any situation you have been proud of me. I will never thank you enough for that.”

We made it!

I thank the almighty Supreme Soul, whose thoughts keeps me energetic and enthusiastic at every anguish moment of my life.

In the end, I am thankful to all those who have helped me directly or indirectly.

By........
