CONTENTS

THESIS ABSTRACT

CHAPTER - 1: INTRODUCTION TO RELIABILITY  
1.1 Introduction 1
1.2 Modes of Failure and Causes 3
1.3 Design for Reliability 5
1.4 Types of System Reliability Models 9
1.5 Reliability Optimization Through Redundancy 16
1.6 General Plan 18
Selected References 21

CHAPTER - 2: LITERATURE REVIEW  
2.1 Introduction 22
2.2 Section - I : System Reliability Optimization with Redundancy Models- Classification Based on System Configuration and Optimization Techniques. 23
References 30
2.3 Section - II : System Reliability Optimization with Redundancy Models-Classification Based on System Structure and due to Heuristic Procedures. 38
References 46

CHAPTER-3: OPTIMIZATION OF AN INTEGRATED RELIABILITY MODEL FOR A REDUNDANT SYSTEM  
3.1 Introduction 54
3.2 Problem Under Consideration 56
3.3 Mathematical Function considered for the analysis with the help of Lagrangean Method. 60
3.4 Case Problem 67
3.5 The Integrated Reliability Model using Dynamic Programming approach for the function. 72
3.6 Discussion. 78
3.7 Computer programming in 'C' 80
References 81

CHAPTER - 4: A K-OUT-OF-N : G SYSTEM-OPTIMAL REPLACEMENT POLICY (N*, a*) UNDER COMMON CAUSE FAILURES WITH REPAIR PROVISION. 82-95

4.1 Introduction 82
4.2 The model 84
4.3 The solution 85
4.4 Numerical results 92
4.5 Discussion 94
References 95

CHAPTER - 5: COMMON CAUSE FAILURES WITH REPAIR PROVISION - OPTIMUM REPLACEMENT POLICY. 96-106

5.1 Introduction 96
5.2 The model 97
5.3 The optimal procedure 99
5.4 Numerical results 103
5.5 Discussion 105
References 106
