ACKNOWLEDGEMENT

The author's grateful thanks are due to Professors Dr. R. Jegatheesan and Dr. S. R. Paranjothi for their having given him an opportunity to undertake the work of this kind and for their guidance and continued encouragement.

It is with a profound sense of indebtedness that the author records his sincere thanks to Professor Dr. P. S. Reddy for his creative ideas and instructive guidance throughout the execution of the research work reported in this thesis.

The author thanks Professor Dr. S. Thiruvengadam for his help in preparing the manuscript of this thesis. He also thanks Professors Dr. C. Eswaran and Dr. S. Renganathan for their encouragement and suggestions.

He is grateful to Professor A. Krishnan, the Secretary and Sri V. Thulasi Doss, the Treasurer, Sri Venkateswara Educational and Health Trust and Professor S. Muthukkaruppan, the Principal, Sri Venkateswara College of Engineering, for their having provided him a conducive atmosphere for this work at Sri Venkateswara College of Engineering.

Finally the author thanks the authorities of the Anna University, School of Electrical and Electronics Engineering and all those others, not specifically mentioned, who in one way or another helped him in carrying out this work.

V. KAMARAJ
