NUMBERING AND REFERRING SCHEME

- The Chapters are numbered from 1 to 6.
- Each Chapter is divided into sections as 1.1, 1.2 for chapter 1 and 2.1, 2.2 for chapter 2 etc.
- Some sections have parts:
  - i. The sections have been denoted as one decimal point, for example 3.1, 3.2 etc. where the whole number denotes the chapter and the decimal point denotes the section.
  - ii. The parts have been denoted as two decimal points, for example 3.1.1, 3.1.2 etc. where the whole number denotes the chapter, the first decimal point denotes the section and second decimal point denoted the part of the section.
- Equations, Tables and graphs have their own serial number for each chapter separately, for example equation 2.1, table 3.2, figure 4.3 etc. The whole number indicates the chapter number in which the equation/table/figure appears and decimal point shows its serial number in the chapter.
