ACKNOWLEDGEMENT

“Matru devo bhavah
Pitru devo bhavah
Acharya devo bhavah”

This Sanskrit shloka is always meaningful when it comes to the question of shaping a child’s future. Words are inappropriate to describe my respect and indebtedness to my mother Mrs. Shashi Prabha Verma, my father, Mr. Ghanshyam Das Verma and my teacher, Professor Baljeet Singh Saharan. It was practically unimaginable for me to get higher education without their prudence, support and courage in every step of my life despite all odds.

I wish to avail the opportunity to extend my sincere heartfelt gratitude to my supervisor Dr. Baljeet Singh Saharan for his enlightened guidance, valuable suggestions and constant support throughout the research work. I salute his sense of humanity and the way looking at the world of science. It was his confidence in me that I could finish my thesis. He was always supporting more like a father and friend besides a teacher. His unparallel vision, calculation power of figure and graphs and scientific interpretation of results were always helpful to guide the direction of research. Thanks are not enough to express my gratitude towards love and affection that I got from Dr. Baljeet Singh Saharan. He is a true karma yogi. Planning and discussions of research over a cup of tea in the laboratory were always meaningful in a friendly atmosphere. His commitment towards any scientific work is commendable. Saying thanks to you for your support would undermine your love and your habit of student nurturing. Sir, I really admire your professional attitude and I would like to follow your lessons.

Heartfelt gratitude and thanks to the Chairperson Dr. Neelam Garg and all the faculty members of Department of Microbiology, Dr. Neeraj Aggrawal and Vijay Sir for their help and support during presentations by their expertise comments and suggestions which improved my understandings. I am very thankful to the Department of Microbiology, Kurukshetra University, Kurukshetra for providing me infrastructure and support to carry out the research. I must thank all the non-teaching staff for their support during my work.

I would like to extend my deep regards to Dr. Lata Nain, Principal Scientist at Indian Agricultural Research Institute (IARI), for her invaluable help and cooperation whenever required.

I am heartily thankful to all my laboratory colleagues Dr. Poonam Ranga, Dr. Anuj Rana, Dr. Vibha Nehra, Dr. Deepansh, Dr. Ankita, Dr. Meena, Kusum Narwal, Nisha Sharma, Rachna and Vidur Bhatia for their help in all the spheres of work outrightly. I am grateful to all my friends and family for their unconditional love and support.

My sincere thanks to all my friends especially Pooja Goswami, Vishal Solanki, Rajat Jauhar, Ravinder Kaushik, Praveesh Pant, Pankaj, Meenu Goswami, Neeraj Kumar, Mayank Gupta, Himanshu Manchanda, Neha Dhiman and Devender for their long friendship and endless support, whenever I needed them the most.
My husband Kapil Dhawal, who always stood by my side with endless support in my good and bad times and my son, Devesh (Krishna) who missed me a lot during my study period and sacrificed his happiness for me. Their love and support has given a lot of courage to me to finish this work smoothly. They have been the driving force for me and have always shown me the way out to the sunlight. I owe special place in my heart for them.

No choice of words will suffix to adequately register my respect to my dear parents for their love, encouragement and silent sacrifices throughout my childhood days and academic career. All my accomplishments are due to their blessings, love and support. The endless support, coordination and commitment towards me by my loving brother Sameer Verma and sister-in-law Anju Verma are incomparable, my nephew Samridh and niece Samaiyra for being always there with me when situations were tough.

I also convey my heartfelt thanks to my dearest sister Dr. Esha Gandhi and my loving brother Punit Girdhar for the endless support, encouragement and care endowed by them. I also convey my indebtedness to my respected in-laws Maa Mrs. Vimla Dhawal and papa Mr. Om Prakash Dhawal for rendering outright help to me during tenure of my thesis. They were very much supportive and affectionate.

I would also like to convey my special thanks with lots of love to my teachers Dr. Girish Chandra, Mr. Pavinder Singh Bal and Dr. Deepika Sharma for their moral support and guidance.

I would like to convey my sincere thanks to my teacher Late Dr. Ajai Swami for his untiring efforts and love that encouraged me to achieve my goals in life. I know he looks upon me through heaven and blesses me.

Thanks to all my subjects for the cause of science and voluntary participation in the study. Thanks to the almighty God for giving me opportunity to serve the humanity through science.

(Shuchita Verma)
