CONTENTS

CHAPTER 1: INTRODUCTION TO KNOWLEDGE BASED SYSTEMS

1.1 ARTIFICIAL INTELLIGENCE................................................. 1

1.2 KNOWLEDGE & ITS COMPONENTS
    1.2.1 Data Pyramid........................................................ 1
    1.2.2 Components of Knowledge................................... 2
    1.2.3 Knowledge Transfer.............................................. 3
    1.2.4 Knowledge Management...................................... 4

1.3 DETAILED LOOK ON KBS
    1.3.1 Components of the Knowledge Based Systems.... 4

1.4 CATEGORIES OF THE KBS
    1.4.1 Expert Systems.................................................... 6
    1.4.2 Database Management Systems in Conjunction
          with an Intelligent User Interface.......................... 7
    1.4.3 Linked Systems.................................................... 8
    1.4.4 CASE Based Systems......................................... 8
    1.4.5 Intelligent Tutoring Systems................................ 8

1.5 KBS DEVELOPMENT PROCESS........................................... 8

1.6 DIFFICULTIES AND ISSUES WITH THE KBS....................... 9

1.7 CURRENT TRENDS AND DEVELOPMENTS
    1.7.1 Development in Knowledge Based Systems
          Techniques................................................................... 10
    1.7.2 KBS Applications............................................. 14
    1.7.3 Summary............................................................... 18

CHAPTER 2: KNOWLEDGE BASED SYSTEMS FOR SOCIO-ECONOMIC RURAL DEVELOPMENT

2.1 INFORMATION TECHNOLOGY FOR DEVELOPMENT.............. 1

2.2 KNOWLEDGE BASED SYSTEMS ...................................... 3

2.3 KNOWLEDGE BASED SYSTEMS: EXAMPLES...................... 7

2.4 METHODOLOGIES AND TECHNIQUES ................................ 8

2.5 FUTURE OF KBS.......................................................... 9

2.6 CONCLUSION................................................................. 9
CHAPTER 3: A MULTI LAYER KNOWLEDGE BASED ADVISER FOR SMALL-SCALE AND COTTAGE INDUSTRIES

3.1 INTRODUCTION
3.1.1 Indian Economy .................................................. 1
3.1.2 Role of Small and Cottage Industries in Indian Economy .......................................................... 1
3.1.3 Features of the Business ...................................... 2

3.2 PROPOSED SYSTEM
3.2.1 Objectives ............................................................ 4
3.2.2 Multi Layer Structure of the KBS .......................... 5
3.2.3 Advantages of the Multi Layer Architecture .......... 6
3.2.4 Control Layer in the System ................................. 9
3.2.5 Control Strategy .................................................... 9

3.3 AN APPLICATION
3.3.1 Membership Functions for Shoe Making Business 11
3.3.2 Some Rules for Illustration ................................ 13

3.4 VALIDATION & VERIFICATION REPOSITORY
3.4.1 Importance and Need of V & V Techniques ............ 14
3.4.2 V & V Layer ........................................................ 15
3.4.3 How it Works ? ..................................................... 16

3.5 CONCLUSION ......................................................... 17

3.6 FURTHER RESEARCH SCOPE .................................... 17

CHAPTER 4: HEURISTIC EVALUATION FUNCTIONS FOR IDENTIFYING THE SUITABLE BENEFICIARIES: A CASE OF SOCIO-ECONOMIC RURAL DEVELOPMENT

4.1 INTRODUCTION .......................................................... 1

4.2 CASE FOR SOCIO-ECONOMIC DEVELOPMENT
4.2.1 A Sample Heuristic Evaluation Function .......... 4
4.2.2 Optimization of HEF: HEF* ......................... 5

4.3 MULTI MODEL APPROACH FOR BETTER SOLUTION ..... 6

4.4 CONCLUSION ............................................................ 6
CHAPTER 5: A REUSABLE DESIGN APPROACH FOR DEVELOPING KNOWLEDGE BASED SYSTEM

5.1 INTRODUCTION .......................................................... 1
5.2 THE METHODOLOGY ....................................................... 2
5.3 DEVELOPING KBS THROUGH RDA ............................ 3
5.4 CASE STUDY .............................................................. 5
5.5 CONCLUSION ................................................................. 8
5.6 FUTURE SCOPE ............................................................. 9

CHAPTER 6: EXECUTIVE EXPERT SYSTEM FOR PHYSICAL INFRASTRUCTURE DEVELOPMENT: A CASE OF TYPICAL INDIAN UNIVERSITY

6.1 PHYSICAL INFRASTRUCTURE DEVELOPMENT ................ 1
6.2 EDUCATION AS AN INFRASTRUCTURE
   6.2.1 Introduction ..................................................... 2
   6.2.2 Activities in a University ................................... 3
6.3 TECHNOLOGY FOR EDUCATIONAL INFRASTRUCTURE .... 4
6.4 PROPOSED EXECUTIVE EXPERT SYSTEM (EES) FOR THE ENVIRONMENT
   6.4.1 Introduction ..................................................... 8
   6.4.2 Examples of EES ................................................ 9
   6.4.3 Multimedia Databases in Students Information System: An Example ............ 13
   6.4.4 Few Rules to Build a Knowledge Base for Course Selection for Student Information System 14
6.5 CONCLUSION ................................................................. 15

CHAPTER 7: INTELLIGENT TUTORING SYSTEMS

7.1 INTRODUCTION .......................................................... 1
7.2 FEATURES AND BENEFITS ............................................. 1
7.3 CATEGORIES OF KNOWLEDGE
   7.3.1 Knowledge about Domain ..................................... 3
   7.3.2 Knowledge about Learner ..................................... 3
   7.3.3 Knowledge about Knowledge .................................. 4
   7.3.4 Knowledge about Process ..................................... 4
