The author would like to record his deepest gratitude to Dr. C. C. Desai, Reader in Physics, for his enthusiastic encouragement and untiring and stimulating guidance during the course of his research programme. The laboratory facilities provided by Professor M.S. Joshi, Head of the Department is very gratefully acknowledged. The encouragement of Professor A.R. Patel, Ex-Head of the Department, was an elixir of strength.

I wish to express my extreme indebted to Professor M.K. Agarwal who introduced me to this department and Professor B.L. Garg, Government College, Beawar (Rajasthan) for constant inspiration of this work. Sincere thanks are also due to Dr. S.K. Arora and Dr. T. C. Patel for contributing to the work.

I am indebted to Dr. G.K. Shivakumar who has not only gone through the manuscripts of this thesis but also for his helpful criticism, discussions and suggestions and to Dr. T. P. Singh for the help rendered in X-ray analysis work.

rendered me during the course of work.

Director, College Education and Government of Rajasthan deserves special thanks for sanctioning me the academic leave for three years and University Grants Commission, New Delhi for awarding a Teacher Fellowship under FIP, during the tenure of which the present work was carried out.

In addition the cooperation of the staff of the office and USIC, the burden of typing the final manuscript was undertaken by Mr. Prakash Salvi, who deserves special acknowledgement.

Finally, I would like to acknowledge my wife Mrs. Gyan, my sons Manish and Vineet and other family members whose cooperation, goodwill and inspiration far exceeds that my words of appreciation can express.

Jyoti Lal A Rai
