JIM SCALE

We are trying to know how students think and feel about the things definitely. Therefore we are putting before you some questions in this scale. It is not an intelligence test or an information test. Each statement does not require an yes or no response, but we expect you to show your feeling for the statement according to your opinion. So your response shows the agreement or disagreement at two points. Your responses to the statements lead us to conclude something as we desire.

Please read each statement carefully. There are four points in the scale as shown below:

+1. acceptance with moderate agreement.
+2. acceptance with complete agreement.
-1. acceptance with moderate disagreement.
-2. acceptance with complete disagreement.

Keeping in view these four points put a tick in the column of agreement or disagreement in the answer sheet according to your feeling about the statement.

Please tick all the questions and return the test booklet with the answer sheet.

Thanking you,

Investigator
1. The afternoon is the best part of the day.
