## CONTENTS

### Chapter I: Introduction

1.1 Background .................................................. 1
1.2 Government Expenditure on Major and Medium Irrigation Projects ............... 2
1.3 Statewise Government Investment and Irrigation Potential Created ................. 4
1.4 Statewise Revenue Receipts and Expenditure on Irrigation Projects ................. 5
1.5 The Existing Practices of Canal Water Pricing in Different States of India ........ 7
1.6 Prevalent Canal Water Rates in Different States of India .......................... 11
1.7 The Objectives of Fixing Canal Water Rates ........................................ 12
1.8 The Existing Modes of Canal Water Supply for Irrigation .......................... 13
1.9 The Existing Approaches to Canal Water Pricing ...................................... 15
1.9.1 The Cost approach or Supply Based Approach .................................... 15
1.9.2 The Benefit Approach or Demand Based Approach ............................... 17
1.10 Some Emerging Issues in Canal Water Pricing ........................................ 18
1.11 Organisation of the Thesis .......................................... 19

### Chapter II: Review of Literature

2.1 Introduction .................................................. 21
2.2 Financial Working of Irrigation Projects ........................................... 21
2.3 Revision of Water Rates ........................................... 31
2.4 Economics of Irrigation Projects ........................................... 34
2.5 Methodological Issues ............................................. 38
2.6 Concluding Remarks .............................................. 38

### Chapter III: Research Methodology

3.1 Introduction .................................................. 47
3.2 The Objectives of the Study ......................................... 47
3.3 Hypotheses of the Study ........................................... 47
3.4 The Sampling Design .............................................. 48
Chapter IV: A Profile of the Study Areas and the Sample Households

4.1 Introduction 68
4.2 The Sample States 68
4.3 The Sample Districts 68
4.3.1 Location 68
4.3.2 Demographic Features 69
4.3.3 Topography, Soil and Climate 71
4.3.4 Administrative Units 73
4.3.5 Infrastructures 73
4.3.6 Land Use Pattern 74
4.3.7 Agriculture 74
4.4 The Sample Blocks 78
4.5 The Sample Villages 79
4.6 The Sample Households 82
4.6.1 General Features 82
4.6.2 Age 83
4.6.3 Sex 84
4.6.4 Education 85
4.6.5 Caste 85
Chapter V : Cost of Supplying Irrigation Water

5.1 Introduction 98
5.2 Gross Area Irrigated, Operation and Maintenance Expenditure, annualised Cost and Receipts in the Sample states 98
5.3 Comparison of the Existing Rates with the Calculated Rates 100
5.4 Rates on the Basis of Recovery of Losses 102
5.5 Cost of Supplying Irrigation Water of the Distributaries/Minors 103
5.6 Distribution and Costs of Tube-well Irrigation 105
5.6.1 Tube-well Ownership Pattern 105
5.6.2 Sources of Funds 106
5.6.3 Distribution of Tube-wells by Horsepower 107
5.6.4 Irrigated Area by Source and by Season 107
5.6.4 Investments in Tube-wells 109
5.6.5 Fixed and operating Costs of Tube-wells 110
5.6.6 Break-up of the Fixed and Operating Cost 112
5.6.7 Average cost per Hour and Existing Rates in the Sample Villages 115
5.4 Concluding Remarks 116

Chapter VI : Benefit Approach to Water Pricing

6.1 Introduction 119
6.2 Why Benefit Approach 119
6.3 Cropping Pattern 121
Chapter VII : The Contingent Valuation Method (CVM) of Pricing Irrigation Water

7.1 Introduction 184

7.2 Perceptions of the Sample Irrigators About the Quality of Irrigation 185

7.3 Sample Farmers perception About the Prevailing Water Rates 187

7.4 Willingness to Pay for Irrigation 189

7.5 Willingness to Pay for Irrigation by Size Group 190

7.6 Concluding Remarks 192
Chapter VIII: Summary, Conclusions and Policy Implications

8.1 Introduction 193
8.2 The Problem Statement 194
8.3 Research Methodology 195
8.4 Major Findings 198
8.5 Policy Implications 202
