It is a pleasure and privilege to express a deep sense of gratitude to my guide Dr. Miss N.L. Pandya of M.B. Patel College of Education, Vallabh Vidyanagar not only for her continuous intellectual inspiration and encouraging guidance but also for her affection and support. The manner in which she treated me during the course of my investigation was exemplary and beyond the description of words.

I also express my indebtedness to Dr. D.N. Patel who has helped me a lot in preparing a research design and suggested different yet appropriate statistical techniques to test various hypotheses included in this report.

I am also grateful to the principals, teachers and students of some forty secondary schools of Eastern Region of Thailand who responded willingly to the instruments used in this investigation. I wish to express my appreciation for the principals who threw open their schools for getting important information regarding teachers and pupils.

I am greatly indebted to authors whose works have been consulted and made use of in carrying out this research study.

I am thankful to all my friends and colleagues for their valuable help and good wishes.
I sincerely owe my debt to the Government of Thailand and Consulate of Thailand in India for their quick rendering of the help.

I also thank to Mr. Jasvant C. Christian who helped me in typing neatly and accurately.
