List of Tables

Table 1: Summary of major studies on exchange rate exposure from developed markets .................. 25
Table 2: Summary of major studies on exchange rate exposure from emerging markets ............. 28
Table 3: Hypothetical relationships of firm-level internal governance measures with exchange rate exposure .................................................................................................................. 49
Table 4: Industry classification and international trade pattern of sample firms .......................... 59
Table 5: Summary statistics for market portfolio returns and exchange rate changes .................. 62
Table 6: Unit root test results (Intercept and Trend) ................................................................. 65
Table 7: Co-integrating Coefficients .......................................................................................... 65
Table 8: Error Correction Models ............................................................................................. 67
Table 9: Summary of exchange rate exposure coefficients from Gao’s (2000) model .............. 68
Table 10: Summary of exchange rate exposure coefficients from proposed model ................ 69
Table 11: Comparing alternative models: Statistical significance of exchange rate exposure coefficients .......................................................................................................................... 72
Table 12: Comparing alternative models: Economic significance of exchange rate exposure coefficients ....................................................................................................................... 73
Table 13: Intervention by central bank during sub-periods ....................................................... 77
Table 14: Average of exchange rate exposure coefficients during sub-periods ....................... 78
Table 15: Industry Level Evidence ............................................................................................. 80
Table 16: Robustness Analyses .................................................................................................. 84
Table 17: Summary Statistics of firm characteristics, hedging activities and measures of internal firm-level governance ........................................................................................................... 87
Table 18: Comparison of exposure coefficients across governance variables: a univariate analysis ................................................................. 90
Table 19: Pairwise Correlations .................................................................................................. 92
Table 20: The impact of firm-level internal governance on exchange rate exposure .................. 96
Table 21: Impact of currency derivative usage on exposure under different level of firm-level Governance mechanisms .................................................................................................................. 99
Table 22: The impact of firm-level governance factors on exchange rate exposure: a sub-period analysis ........................................................................................................................................... 105
Table 23: The impact of firm-level governance factors on exchange rate exposure with hedging proxies .......................................................................................................................... 109
Table 24: The impact of firm-level governance factors on significant exchange rate exposure coefficients .......................................................................................................................... 112
Table 25: The impact of firm-level internal governance factors on exchange rate exposure using alternative control variable ................................................................................................... 113
