

## LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
3.1	Test Set-up and Stress-Strain Behaviour of Coupon	22
3.2	Experimental Set-up for Compression Strength	25
3.3	Details of Experiments Conducted	28
3.4	Cross Sectional and Longitudinal View of the Beam Specimens	30
3.5	Fabrication of the Specimens	32
3.6	Fabricated Specimens	33
3.7	Specimens before Concreting the Web	34
3.8	Specimens with Concrete Encased Web	34
3.9	Schematic Diagram of Experimental Set-up	35
3.10	Experimental Set-up for the Test Specimens	36
4.1	3D Solid Bodies	39
4.2	Meshing of the Beams	41
4.3	Beams with Boundary Conditions	43
5.1	Load-Deflection Curves of the Specimens with 150 mm Depth	48
5.2	Load-Deflection Curves of the Specimens with 200 mm Depth	51
5.3	Ultimate Load Versus Central Deflection of the Specimens with Plain and Corrugated Web	53
5.4	Comparison of the Strength Capacity of the Specimens with Plain and Corrugated Web	54
5.5	Load-Deflection Curves of the Concrete Encased Specimens with 150 mm Depth	57

<b>FIGURE NO.</b>	<b>TITLE</b>	<b>PAGE NO.</b>
5.6	Load-Deflection Curves of the Concrete Encased Specimens with 200 mm Depth	61
5.7	Ultimate Load Versus Central Deflection of the Concrete Encased Specimens with Plain and Corrugated Web	62
5.8	Comparison of the Strength Capacity of the Concrete Encased Specimens with Plain and Corrugated Web	63
5.9	Load-Strain Curves for Steel Beam Specimens with 150 mm Depth	66
5.10	Load-Strain Curves for Steel Beam Specimens with 200 mm Depth	70
5.11	Load-Strain Curves for Beam Specimens with Plain and Corrugated Web	71
5.12	Load-Strain Curves for Encased Beam Specimens with 150 mm Depth	75
5.13	Load-Strain Curves for Encased Beam Specimens with 200 mm Depth	79
5.14	Load-Strain Curves for Encased Beam Specimens with Plain and Corrugated Web	80
5.15	Moment Curvature Curves for the Beam Specimens with 150 mm Depth	82
5.16	Moment Curvature Curves for the Beam Specimens with 200 mm Depth	83
5.17	Moment Curvature Curves for Encased Beam Specimens with 150 mm Depth	84
5.18	Moment Curvature Curves for Encased Beam Specimens with 200 mm Depth	85
5.19	Lateral Displacement Moment Curves for the Beam Specimens with 150 mm Depth	88

<b>FIGURE NO.</b>	<b>TITLE</b>	<b>PAGE NO.</b>
5.20	Lateral Displacement Moment Curves for the Beam Specimens with 200 mm Depth	91
5.21	Comparison of Lateral Buckling Moment of Steel Beams	92
5.22	Lateral Displacement Moment Curves for Encased Beam Specimens with 150 mm Depth	96
5.23	Lateral Displacement Moment Curves for Encased Beam Specimens with 200 mm Depth	99
5.24	Comparison of Lateral Buckling Moment of the Encased Beams	100
5.25	Definition of Yield and Ultimate Displacement	101
5.26	Failure Mechanism of Steel Beams with 150 mm Depth	106
5.27	Failure Mechanism of Steel Beams with 200 mm Depth	109
5.28	Failure Mechanism of Encased Beams with 150mm Depth	113
5.29	Failure Mechanism of Encased Beams with 200mm Depth	116
5.30	Deflected Shape for the Specimens with 150 mm Depth	120
5.31	Deflected Shape for the Specimens with 200 mm Depth	123
5.32	Load-Deflection Curves for the Specimens with 150 mm Depth	127
5.33	Load-Deflection Curves for the Specimens with 200 mm Depth	130
