ACKNOWLEDGEMENT

The infectious enthusiasm of Dr. K. Udayakumar comes as a breath of fresh air in the staid groves of academia. Prof. K. Dharmalingam has been a veritable bulwark, insulating me from many of life's vicissitudes. Prof. M.A. Panneerselvam has offered help and advice which have proved instructive. I am enormously indebted to Ms. S. Usa, an epitome of sincerity and kindness. The industriousness of Mrs. D. Varalakshmi is to be seen to be believed.

It has been an enriching experience working with Shri 'Y. Purushottam Garu'. The appearance of the thesis owes a lot to the zealousness of the ME students of the batch of '94.

I am thankful to Shri K. Ramesh and Shri R.K. Parasuram among other industrialists who have been of very considerable help.

I thank the MHRD Govt. of India for providing financial assistance during the period of the work.

Lastly a word of thanks to my parents.
