# CONTENTS

| 1 | INTRODUCTION | 1 - 7 |
| 2 | AIMS AND RELEVANCE OF THE STUDY | 8 |
| 3 | REVIEW OF LITERATURE | 9 - 96 |
| 3.1 | Concepts of meditation in traditional yogic and spiritual literature | 9 - 53 |
| 3.1.1 | Background and Scope | 10 |
| 3.1.2 | Aims and objectives | 12 |
| 3.1.3 | Materials and methods | 13 |
| 3.1.3.A | Source material | 13 |
| 3.1.3.B | Methods | 13 |
| 3.1.4 | Concept of meditation | 14 |
| 3.1.4.A | Definition of meditation | 14 |
| 3.1.4.A1 | Concentration | 14 |
| 3.1.4.A2 | Dhāranā | 15 |
| 3.1.4.A3 | Dhyāna | 17 |
| 3.1.4.B | Steps in meditation | 19 |
| 3.1.4.B1 | Objects of meditation | 20 |
| 3.1.4.B2 | Requisites of meditation | 21 |
| 3.1.4.C | The states of mind | 23 |
| 3.1.4.D | Goal of meditation | 28 |
| 3.1.4.E | Process of meditation | 29 |
| 3.1.4.F | Benefits of meditation | 31 |
| 3.1.5 | Techniques of meditation | 33 |
| 3.1.5.A | Traditional techniques of meditation | 34 |
| 3.1.5.B | Popular techniques of meditation | 42 |
| 3.1.5.B1 | ‘OM’ meditation | 42 |
| 3.1.5.B2 | Transcendental meditation | 42 |
| 3.1.5.B3 | Tantric meditation | 42 |
| 3.1.5.B4 | Brahmakumaris Raja yoga meditation | 43 |
| 3.1.5.B5 | Zen meditation | 43 |
| 3.1.5.B6 | Vipassanā meditation | 43 |
| 3.1.5.B7 | Prekṣā meditation | 44 |
| 3.1.5.B8 | Yoga nidra | 44 |
| 3.1.5.C | Modern techniques of meditation | 45 |
| 3.1.6 | Cyclic meditation | 46 |
| 3.1.6.A | Definition | 46 |
| 3.1.6.B | Principles and basis of CM | 46 |
| 3.1.6.C | Technique of CM | 48 |
| 3.1.7 | Conclusion | 52 |
3.2  A review of the scientific literature on meditation  54 – 96
3.2.1 Studies on meditation  54
3.2.1.A Studies on Transcendental meditation  54
3.2.1.B Studies on Zen meditation  59
3.2.1.C Studies on Tantric meditation  60
3.2.1.D Studies on ‘OM’ meditation  61
3.2.1.E Studies on Brahmakumaris Raja yoga meditation  62
3.2.1.F Studies on Tai Chi Chuan Meditation  63
3.2.2 Studies on yogic relaxation techniques  68
3.2.2.A Studies on Śavāsana  68
3.2.2.B Studies on yoga based isometric relaxation  71
3.2.2.C Studies on Śānti kriyā  71
3.2.2.D Studies on Yoganidra  72
3.2.2.E Studies on yoga stretching and relaxation  73
3.2.3 Studies on general relaxation techniques  74
3.2.3.A Studies on progressive muscle relaxation  74
3.2.3.B Studies on relaxation training  76
3.2.4 Studies on Cyclic meditation  78

4  METHODS  97 – 125
4.1 Subjects  97
4.1.1 Sample size  97
4.1.2 Inclusion criteria  97
4.1.3 Exclusion criteria  97
4.1.4 Source  98
4.1.5 Ethical considerations  98
4.2 Assessments  98
4.2.1 Respiratory and metabolic variables  98
4.2.1.A Selection of respiratory and metabolic variables  98
4.2.1.B Principle and specifications of Oxycon Pro system  99
4.2.1.C Familiarization of the subject with the laboratory environment and with the study  101
4.2.1.D Recording conditions  101
4.2.1.E Calibration of the equipment  101
4.2.1.F Recording procedure  102
4.2.1.G Variables measured  103
4.2.2 Heart rate variability (HRV)  104
4.2.2.A Recording conditions  106
4.2.2.B Specifications of Niviqure system  106
4.2.2.C Testing procedure  106
4.2.2.D Variables measured  107
4.2.3 Computer averaged P300 auditory evoked potentials  109
4.2.3.A Specifications of Nicolet Bravo system  109
4.2.3.B Selection of auditory oddball P300 evoked potentials  111
4.2.3.C Recording conditions  111
4.2.3.D Electrode positions  111
4.2.3.E Amplifier settings
4.2.3.F Stimulus characteristics
4.2.3.G Testing procedure
4.2.3.H Variables measured
4.2.4 Six letter cancellation test (SLCT)
4.2.4.A Testing procedure
4.2.4.B Reliability and validity
4.2.5 Visual analogue scale (VAS)
4.2.5.A Testing procedure
4.2.5.B Variables measured
4.3 Design
4.3.1 Structure of sessions
4.3.2 Order of sessions
4.3.3 Time allocation within the sessions
4.3.3.A Cyclic meditation session
4.3.3.B Supine rest session
4.4 Interventions
4.4.1 Cyclic meditation
4.4.2 Supine rest
4.5 Data extraction
4.5.1 Respiratory and metabolic variables
4.5.2 Heart rate variability (HRV)
4.5.3 Computer averaged P300 auditory evoked potentials
4.6 Data analysis

5 RESULTS
5.1 Respiratory and metabolic variables (RMV)
5.1.1 Total minute ventilation
5.1.2 Tidal volume
5.1.3 Respiratory rate
5.1.4 Oxygen consumption
5.1.5 Carbon dioxide output
5.1.6 Partial pressure of carbon dioxide in alveoli
5.1.7 Partial pressure of end tidal carbon dioxide
5.1.8 Partial pressure of end tidal oxygen
5.1.9 Energy expenditure
5.1.10 Visual analogue scale while recording RMV
5.2 Heart rate variability (HRV)
5.2.1 Low frequency power (LF) of the HRV spectrum
5.2.2 High frequency power (HF) of the HRV spectrum
5.2.3 Ratio of LF/HF
5.2.4 Heart rate
5.3 Computer averaged P300 auditory evoked potentials
5.3.1 Peak latency of P300 recorded at Fz
5.3.2 Peak amplitude of P300 recorded at Fz
5.3.3 Peak latency of P300 recorded at Cz
5.3.4  Peak amplitude of P300 recorded at Cz  159
5.3.5  Peak latency of P300 recorded at Pz  159
5.3.6  Peak amplitude of P300 recorded at Pz  161
5.3.7  Visual Analogue Scale (VAS) while recording P300  163
5.4    Six letter cancellation test (SLCT)  165
5.4.1  Net scores of letter cancellation test  165

6  DISCUSSION  168 – 180
6.1   Respiratory and metabolic variables  168
6.2   Heart rate variability (HRV)  173
6.3   Computer averaged P300 auditory evoked potentials  175
6.4   Six letter cancellation test (SLCT)  177

7  SUMMARY AND CONCLUSIONS  181 - 182

8  APPRAISAL  183

REFERENCES  184 - 199

APPENDICES  200 - 298
  Appendix- 1 : Copy of informed consent  200
  Appendix- 2 : Table of details about subjects  201
  Appendix- 3 : Six letter cancellation test, work sheets  207
  Appendix- 4 : Visual analogue scale, sample sheets  209
  Appendix- 5 : Raw data tables  211
