ACKNOWLEDGEMENT

The author is grateful to the Vice Chancellor, Anna University and Director, Madras Institute of Technology, Anna University for providing organisational facilities for carrying out this research work at MIT.

The author is very much indebted to Dr. S.Renganathan, Director, school of Instrumentation and Electronics, Madras Institute of Technology, Anna University for his excellent guidance and continuous encouragement throughout this work. The content of thesis are the outcome of many long and inspiring discussions that the author had with him especially during many late evenings and holidays in addition to working hours in the past few years. His constant motivation helped the author to experiment with various innovative techniques. He proved himself to be a model guide for a research work with his unlimited thinking capability over a problem. The author wishes to express his deep sense of gratitude for the help rendered by him.

The author thanks Dr. P.Kanagasabapathy, Mr. Renganath Muthu, Mr. Irfran Thalib, Mr. V.V.S. Murthy, Mr. P. Vinodchandran, Ms. Annie John, Ms. Ezhilarasi, Ms. B. Maragatham, Mr. Sudharsanam and Mr. V. Selvakumar for their help in the preparation of this thesis.

The author also wishes to thank the Government of Germany for their equipment support to the School of Instrumentation and Electronics which was very useful for carrying out this research work.
