### LIST OF TABLES

3.1 Values of the Performance Index $I_k$ for the 3-clustered data in 2-D using K-Means Algorithm ... 19

3.2 Values of the Performance Index $H_k$ for the 2-D data ... 21

3.3 Values of the Regularity Index $R_l$ for the Synthetic data (Based on $I_k$ values) ... 29

3.4 Values of the Regularity Index $R_l$ for the Synthetic data (Based on $H_k$ values) ... 30

4.1 Five-Class 3-D Overlapping Data ... 47

4.2 Accuracy Results for FAST_CLUST using various distance measures ... 54

4.3 Accuracy Results for FAST_CLUST and SOM_NET ... 54

5.1 Various Classes in the Study Area (Part of Madras city) ... 63

5.2 Classification results by using the Maximum likelihood classifier and backpropagation algorithm for various number $N$ of nodes in the hidden layer and the mean squared error ... 70

5.3 Classification results for Revised Training Areas after deletion of erroneous pixels ... 71

5.4 Classification results for the new training areas after the elimination of redundant weights ... 80

5.5 Number of classified pixels in all the classes for three bands (band2, band3 and band4) ... 84

6.1 Comparison of weekly composited NOAA-AVHRR derived SSTs with those of the observations obtained by using different methods for the Arabian Sea ... 108

6.2 Comparison of weekly composited NOAA-AVHRR derived SSTs with those of observations obtained by using different methods for the Bay of Bengal ... 109

6.3 Comparison of weekly composited NOAA-AVHRR derived SSTs with those of observations obtained by using different methods for the Central Indian Ocean ... 110
