List of tables

Table-2.1 : Sampling station distance from origin of river/ tributary.
Table-2.2 : Sampling station detail sampling station altitude and latitude positions and elevation.
Table-2.3 : Details of fishing nets used.
Table 2.4 : Dams in the Godavari River basin.
Table-3.1 : Samples of fish species collected from the Godavari basin.
Table-3.2 : Sampling rarefaction.
Table-3.3 : Number of species and individuals sampled in each river and average species richness.
Table-3.4 : Sampling details.
Table-3.5 : Species with 300 or more individuals.
Table-3.6 : Simpson’s diversity indices for all species with respect to sampling stations.
Table-3.7 : Species with low number of specimens and limited distribution. For each species a vulnerability score was defined by fish base.
Table-3.8 : Single sampling point and five or fewer individuals.
Table-3.9 : A list of introduced species.
Table-3.10 : Similarity index based on species composition.
Table-3.11 : Habitat types at different sampling stations.
Table-3.12 : Similarity index based on limnological parameters.
