Index

Introduction 1-6
Review of literature 7-20

Chapter 1 Isolation of PGPR, study of their in vitro and in vivo efficacy to control collar rot disease in germinating groundnut seedlings and identification of selected bacteria by 16S rRNA gene sequencing.

Outline 21
Introduction 22
Materials and Methods 23-29
Results 29-59
Discussion 60-63

Chapter 2 Study of induction of resistance in peanut seedlings and in adult plants against A. niger.

Outline 64
Introduction 65-66
Materials and Methods 67-73
Results 74-118
Discussion 119-124

Chapter 3 Study of mechanism of induction of resistance by (Part I) proteome analysis of PGPR treated and untreated seedlings.

Outline 125
Introduction 126
Materials and Methods 127-128
Results 129-147
Discussion 148-149

Chapter 3 Characterization of antifungal compound from (Part II) RL23 and RP10

Outline 151
Introduction 153
