A Note on Documentation

The appendix gives the details of the primary archival material used for the research. Appendix lists the date, month, year and headline of the newspaper editorials over a period of 26 years (1958-1983). It also classifies the editorials into thematic categories used for analysis in the thesis.

Footnotes have been used along with the list of references appended towards the end of the chapters. A separate reference of primary source mostly official documents has also been included. Tables have been numbered and they appear across the chapters. A list of tables follows the table of contents.

In the textual analyses, longer quotations from Deccan Herald, are given in bold letters to mark out the difference from other sources. Deccan Herald has been abbreviated as DH in the text. The names ‘Mysore’ and ‘Karnataka’ have been used interchangeably.

A copy of one specific editorial on the thematic category ‘Prohibition’ is given in Chapter V. The exercise has been carried out to demonstrate the methodological nuances involved in carrying out textual analyses.
